>>9439077

So like, do CIAniggers not realize that this tech could be exploited on their own cars hypothetically? Why are they this outrageously retarded? Is it because of the fact that internally, they're all Reddit-using TVTropes faggots RPing on Ponychan? It just seems pretty short-sighted to have your only defense against this be the fact that no one had leaked it yet.

Anonymous 03/07/17 (Tue) 14:59:14 ID: bf4688 No.9439096

Anonymous 03/07/17 (Tue) 15:07:43 ID: 000000 No.9439146

The iPhone and android hacks are obviously how they bugged Trump for blackmail info. Also how they penetrated some derelict hotel email server to create communications with Russia and hoodwink some moron judge into a FISA warrant/fishing expedition. So maybe Comey was telling the truth when he said the FBI wasn't the one 'wiretapping' Trump.

Anonymous 03/07/17 (Tue) 15:09:33 ID: d6eb80 No.9439163

Guys, it will be easier if we can get a bit of an assembly line going. If some anons could focus on scraping the memeposts out of the drop and post them on here, others can do reverse image searches and post anything interesting, while others can dig into any hits.

We might even be able to match names to CIA agents, since their fucking opsec is so fucking god damn terrible.

CIA malware targets iPhone, Android, smart TVs

Have more here:

https://wikileaks.org/ciav7p1/

Some parts of text

>These techniques permit the CIA to bypass the encryption of WhatsApp, Signal, Telegram, Wiebo, Confide and Cloackman by hacking the "smart" phones that they run on and collecting audio and message traffic before encryption is applied.

Leftypol are a pathetic cancer and shills tryingh to dominate other boards and shill against /pol/ while defend the establshment with some other bullshit garbage sometimes, if we live under the rule of these disgusting trash trying to shill and make board war we never would have real information
8chan have their userbase constructed in /pol/ and gamergate exodus, leftypol shills who try to find libtards on reddit and shill for government will not win.

Now i want to know, will the left-wing websites of tech who only copy and paste the media owned by democrats party

http://www.zerohedge.com/news/2016-12-07/ultimate-fake-news-list

Report this wikileaks about CIA? Or they will try to supress, hide, everything like HIllary Clinton and DNC Hacked emails on wikileaks? And this is only the first pack

>truthrevolt.org/news/dnc-emails-here-staff-staged-fake-anti-trump-protests-used-bernies-jewish-faith-discredit-him

You know that moment, when you say to yourself "come on, that's stupid, no way in hell is this real" and then it proves not only to be real, but even more stupid? This is it.

CIA has a memetics division. Let that fucking sink in for a moment. And to top it off, it's made from *LARPing bronies*.

This is it. I want to say that it can't get dumber than this, but I'd probably be proven wrong within a day. We're officially in bizarro world. 2017 is the best year of all years, and this is the best timeline of all timelines.

And keep in mind, their "internal" memetics division is for PsyOps against the plebs in the military. If you read the white paper I pulled this from, they talk about how they use 4D chess (they literally talk about planting ideas that they expect will break into secondary and tertiary memes) to affect the culture inside the military and inside corporations. They not only PsyOp the public, they PsyOp their own plebs and brag about it in public white papers.

>the small guys have an unironic Memetic Warfare Division dedicated to forcing memes and brony shitposting

When we talk about how powerful our memes are, I think most assumed that only extended to influencing normalfags via twitter and website comments.

Now we know that according to the consensus of the world's deepest shadow governments, when we say we memed a President into office, we LITERALLY memed a President into office and they cannot even begin to understand our methods.

I'd say this is the most ridiculous thing that's happened on all my years posting on imageboards, but I'm sure something even more insane will happen within the next week.

This is a good summary of the findings. The one thing I would add is an emphasis on the fact that this is the CIA, not the NSA, and it proves the CIA has its own out of control spy grid in place, that apparently has gotten away from them. Of course, we knew all this already, but it's another avalanche of proof that, ██████████ ████ ██ ██████ █████

Anonymous 03/07/17 (Tue) 16:39:57 ID: d2b2e4 No.9439787

These techniques permit the CIA to bypass the encryption of WhatsApp, Signal, Telegram, Wiebo, Confide and Cloackman by hacking the "smart" phones that they run on and collecting audio and message traffic before encryption is applied.
The CIA also runs a very substantial effort to infect and control Microsoft Windows users with its malware. This includes multiple local and remote weaponized "zero days", air gap jumping viruses such as "Hammer Drill" which infects software distributed on CD/DVDs, infectors for removable media such as USBs, systems to hide data in images or in covert disk areas ("Brutal Kangaroo") and to keep its malware infestations going.
Many of these infection efforts are pulled together by the CIA's Automated Implant Branch (AIB), which has developed several attack systems for automated infestation and control of CIA malware, such as "Assassin" and "Medusa".

Attacks against Internet infrastructure and webservers are developed by the CIA's Network Devices Branch (NDB).

The CIA has developed automated multi-platform malware attack and control systems covering Windows, Mac OS X, Solaris, Linux and more, such as EDB's "HIVE" and the related "Cutthroat" and "Swindle" tools, which are described in the examples section below

Operation:Weeping Angel(Reference to Dr Who where you turn your back or blink and the angel gets closer to you)

CIA cyber hack that can take over Samsung smart TV's with a "false" off mode that monitors everything you say,same with TV's that have camera's attached. It can take over smartphones and use them as a location finder,camera and audio recorder without you knowing and it can take over car systems. Basically anything connected to the internet can be used as a spying device at a moment't notice. Possibly even remote assassination in regards to the cars.

8671 pages of CIA cyber intelligence documents were leaked today and this is literally tip of the iceberg.

These techniques permit the CIA to bypass the encryption of WhatsApp, Signal, Telegram, Wiebo, Confide and Cloackman by hacking the "smart" phones that they run on and collecting audio and message traffic before encryption is applied.
The CIA also runs a very substantial effort to infect and control Microsoft Windows users with its malware. This includes multiple local and remote weaponized "zero days", air gap jumping viruses such as "Hammer Drill" which infects software distributed on CD/DVDs, infectors for removable media such as USBs, systems to hide data in images or in covert disk areas ("Brutal Kangaroo") and to keep its malware infestations going.
Many of these infection efforts are pulled together by the CIA's Automated Implant Branch (AIB), which has developed several attack systems for automated infestation and control of CIA malware, such as "Assassin" and "Medusa".

Attacks against Internet infrastructure and webservers are developed by the CIA's Network Devices Branch (NDB).

The CIA has developed automated multi-platform malware attack and control systems covering Windows, Mac OS X, Solaris, Linux and more, such as EDB's "HIVE" and the related "Cutthroat" and "Swindle" tools, which are described in the examples section below

Wikileaks has them and is deciding whether or not and what to release into the wild, seeing as these are unfixed vulnerabilities.

Wikileaks has carefully reviewed the "Year Zero" disclosure and published substantive CIA documentation while avoiding the distribution of 'armed' cyberweapons until a consensus emerges on the technical and political nature of the CIA's program and how such 'weapons' should analyzed, disarmed and published.

Has anyone noticed that people suddenly began doing this same gesture on the past year?

CIA Plans to Hack Cars and Trucks to Carry Out Undetectable Assassinations Anonymous 03/07/17 (Tue) 17:17:12 ID: 338312 No.9440064

WikiLeaks has claimed the CIA planned to hack cars and trucks to carry out assassinations.

The secretive organisation said the U.S. Central Intelligence Agency used the phone's geolocation software to tap into vehicle control systems in modern cars.

The hacking organisation made the statement as it announced a huge release of confidential documents from the CIA as part of its mysterious Year Zero series, founder Julian Assange claimed.

It claims the CIA has been carrying out a global covert hacking program that exploits US and European companies.

It claims these include Apple's iPhone, Google's Android and Microsoft's Windows and even Samsung TVs, which it says "are turned into covert microphones."

Mr Assange was set to speak about Year Zero on Facebook today, but a livestream of the event was reportedly hacked. It is not clear when the event has been rescheduled to.

The group said that from October 2014 the CIA was "looking at infecting the vehicle control systems used by modern cars and trucks" to possibly enable them to "engage in nearly undetectable assassinations."

They added: "The CIA's Mobile Devices Branch (MDB) developed numerous attacks to remotely hack and control popular smart phones."

They claimed these included iPhones, which account for 14% of the market and Google Android, "which is used to run the majority of the world's smart phones (85%) including Samsung, HTC and Sony. 1.15 billion Android powered phones were sold last year."

They claimed: "Infected phones can be instructed to send the CIA the user's geolocation, audio and text communications as well as covertly activate the phone's camera and microphone."

Wikileaked! CIA Able to Access Encrypted Data on Telegram, WhatsApp

The US Central Intelligence Agency (CIA) can hack smartphones and access encrypted information from Telegram, WhatsApp, Signal and Wiebo messengers, the whistleblowing website WikiLeaks said Tuesday, citing confidential information leaked from the CIA.

According to the organization, the CIA has several units specializing in malware designed for specific smartphone operating systems, with dedicated branches for Apple's iOS and Google's Android.

"These techniques permit the CIA to bypass the encryption of WhatsApp, Signal, Telegram, Wiebo, Confide and Cloackman by hacking the 'smart' phones that they run on and collecting audio and message traffic before encryption is applied," the WikiLeaks press release said.

The CIA reportedly failed to disclose serious vulnerabilities, also known as "zero days," of various technology products and proceeded to use them to target the relevant software.

Earlier on Tuesday, the WikiLeaks began to release what it said was an unprecedentedly large archive of CIA-related classified documents.

The first part of the leaks dubbed "Year Zero" comprises 8,761 documents and files from an isolated, high-security network situated inside the CIA's Center for Cyber Intelligence in Langley, Virgina.

"The quantity of published pages in "Vault 7" part one ("Year Zero") already eclipses the total number of pages published over the first three years of the Edward Snowden NSA leaks."

☐ **MI5 and CIA Targeted iPhones, Microsoft and Samsung TVs For Global Hacking Program** Anonymous 03/07/17 (Tue) 17:18:50 ID: 338312 No.9440076

MI5 and CIA Targeted iPhones, Microsoft and Samsung TVs For Global Hacking Program

WikiLeaks has claimed the CIA targeted iPhones and Microsoft Windows and worked with MI5 to turn Samsung TVs into microphones as part of a global hacking programme.

The secretive organisation is about to release a huge trove of confidential documents from the U.S. Central Intelligence Agency as part of its mysterious Year Zero series, founder Julian Assange claimed.

It has issued the release amid claims the CIA has been carrying out a global covert hacking program that exploits US and European company products.

It claims these include Apple's iPhone, Google's Android and Microsoft's Windows and even Samsung TVs, which it says "are turned into covert microphones."

In an online statement on its website, Wikileaks also claims the attack against Samsung smart TVs was developed in cooperation with the UK's domestic intelligence agency MI5/BTSS.

It states: "After infestation, Weeping Angel places the target TV in a 'Fake-Off' mode, so that the owner falsely believes the TV is off when it is on.

"In 'Fake-Off' mode the TV operates as a bug, recording conversations in the room and sending them over the internet to a covert CIA server."

Mr Assange said: "There is an extreme proliferation risk in the development of cyber 'weapons'.

"Comparisons can be drawn between the uncontrolled proliferation of such 'weapons', which results from the inability to contain them combined with their high market value, and the global arms trade.

"But the significance of "Year Zero" goes well beyond the choice between cyberwar and cyberpeace.

"The disclosure is also exceptional from a political, legal and forensic perspective."

The hacking group said the publication release is from 8,761 documents and files from an isolated, high-security network situated inside the CIA's Center for Cyber Intelligence.

Wikileaks said: "Recently, the CIA lost control of the majority of its hacking arsenal including malware, viruses, trojans, weaponized "zero day" exploits, malware remote control systems and associated documentation.

That's the thing though: those people aren't the ones running things any more. The generations of children those people psyop'd for decades? THEY are the ones in charge now.

I think this is an overlooked reason as to why we're seeing so much blatant incompetency in the federal government springing up now so frequently. The CIA/ alphabets/ Deep State/ chosens/ etc successfully set themselves up as the real power in the US and indoctrinated the public to be obedient, but in doing so created a pyrric victory: by taking the people they will inevitably HAVE to pull their ranks from and saturating them with conditioning, they ensured their power is unsustainable. Some probably expected to raise their own kids in isolation and hand the reins off to them, but that's not nearly close to the raw numbers to keep the machine running and a lot would still fall through the cracks anyway. The catch-22 they have now is that any potential agents morally and intellectually bankrupt enough to go along with them will be incompetent brainwashed slugs, while anyone who would actually make a good agent would be intelligent enough to resist their brainwashing and be opposed to them by principle to the point they would actively sabotage them if they managed to be brought into the fold (i.e. /pol/).

I'm not saying these people are completely impotent and will go down easily, but I think it's important to note that at this point most of their power is based on momentum.

tl;dr- Victory has defeated them.

Anonymous 03/07/17 (Tue) 17:40:30 ID: 000000 No.9440234

>>9439885
I think you've misread anon, it seems less like those things are infected in general and more that those are the chosen covers.

>The trojans would be spread across 6 thumbdrives intended to be inserted into the supply chain of a target network/group. Upon opening any of the weaponized applications, the Ricky Bobby 3.0 would becom installed on the machine. This is a configured Ricky Bobby 3.0. Ricky Bobby is persisted via scheduled tasks.

I think it's intended as tools for an undercover, or would be placed on a machine overwriting your normal install with the infected version. Ricky Bobby allows them to monitor remotely, and as there's so many common programs there, chances are the target will have one.

>>9439745
I would imagine it was a timing thing. MLP was probably just starting to pick up steam around the same time they started their meme operations. They likely thought that if they got in on the ground floor of the brony phenomena it would allow them to be more influential as bronies grew in number and horse fuckery wormed it's way into other communities. Trying to push and study memes in a smallish but rapidly growing demographic would be much easier than trying to break into an established one, and being able to observe the young memes as they grew organically would be informative. They didn't seem to understand that bronies didn't just come out of a hole in the ground, they already carried with them memes from chans, reddit, and anywhere else they came from.

The CIA seems fairly intuitive, but cripplingly naive when it comes to influencing the internet. They don't seem to understand you can't force culture anymore like they could when media only worked in one direction, and they seem to think that if they can understand memes, it will become the magic bullet that gives them that control back. And they will never learn anything as long as they continue to think of things in a methodical, rigid way.

>Flash Bang is a tool designed to be able to migrate from a browser process (using sandbox breakout), escalate privileges, and memory load a NOD Persistence Spec dll. To do these things Flash Bang is broken into two parts: FlashBangLoader.dll and FlashBang.dll. FlashBangLoader.dll runs from within the browser process for the duration of execution. FlashBang.dll is written to disk and never runs from within the browser. When loaded into the browser process (Fire and Forget Spec), FlashBangLoader.dll writes FlashBang.dll to disk and then uses the PEULinkedIn_x86x64 privilege escalation module to break out of the sandbox and escalate privileges. Once the tool escalates privileges, it memory loads a NOD Persistence spec dll.

>>9440238
That would imply their memetic warfare capability is significantly more advanced than they let on, and that was one of their proof of concepts.

Though I'd imagine state-sponsored memes would have the same characteristics of forced memes at their origin. Concentrated bursts of seeding delivered in frequent waves on multiple platforms, which refine information to whatever is most attractive. It would have happened within a few weeks and suddenly stop. It would also not yield real result until much later. Once it starts to grow naturally and become self-sustaining, they leave it alone and occasionally nudge it along to see how to manipulate it long-term.

True memes, that catch on, proliferate because they are aligned with truth, and because they have soul. These two things cannot be produced by a group of over-thinking traitorous spies in a boardroom meeting.

This is why evil can only propagate itself when it has a monopoly on communication. Our memes will always win, because we aren't seeking to manipulate people, we are removing the blinders.

Anonymous 03/07/17 (Tue) 18:07:31 ID: 2b646d No.9440506

CERN is the Home of the World Wide Web – Europe's PRISM In 1989, under the guidance of Tim Berners-Lee, CERN began the World Wide Web project, which led to the first webpage in history. On April 30, 1993, CERN announced that the World Wide Web would be free to anyone. Essentially, CERN wrote the base code for individuals to access the internet. The first packet-switched computer network was the ARPANET. It used a backbone of routers called Interface Message Processors. Other packet-switched computer networks began to proliferate in the 1970s, eventually adopting TCP/IP protocols or being replaced by newer networks. The National Science Foundation created NSFNET in 1986 by funding six networking sites using links and peering to the ARPANET. In 1987, this new network was upgraded with links to thirteen sites. These sites included regional networks that in turn connected over 170 other networks. IBM, MCI and Merit upgraded the backbone bandwidth (T3) in 1991. The combination of the ARPANET and NSFNET became known as the Internet.Within a few years, the dominance of the NSFNet backbone led to the decommissioning of the redundant ARPANET infrastructure in 1990. In the early days of the internet, backbone providers exchanged their traffic at governmentsponsored Network Access Points (NAPs), until the government privatized the internet, and transferred the NAPs to commercial providers. A Network Access Point (NAP) is a public network exchange facility where internet service providers (ISPs) connected with one another in peering arrangements. The NAPs were a key component in the transition from the 1990s NSFNET era (when many networks were government sponsored and commercial traffic was prohibited) to the commercial Internet providers of today. The four Network Access Points (NAPs) were defined under the U.S. National Information Infrastructure (NII) document as transitional data communications facilities at which Network Service Providers (NSPs) would exchange traffic, in replacement of the publicly-financed NSFNET Internet backbone. The original four NAPs are inWashington, D.C., New York, Chicago, and California. As a transitional strategy, NAPs were effective, giving commercial network operators a bridge from the internet's beginnings as a government-funded academic experiment, to the modern internet of many private-sector competitors collaborating to form a network-of-networks, anchored around Internet Exchange Points

Cisco Systems – Child of DARPA Cisco Systems, Inc. is an American multinational technology company headquartered in San Jose, California, that designs, manufactures and sells networking equipment. It is considered to be the largest networking company in the world. Cisco was one of the first to sell commercially successful routers supporting multiple network protocols, routers that quickly became vital to Internet service providers and by 1998 gave Cisco de facto monopoly in this critical segment. Essentially, every internet message originally went through a Cisco router. In 2000, Cisco became the most valuable company in the world, with a market capitalization of more than US $500 billion. Cisco's Linksys E2700, E3500, E4500 devices have been reported to be remotely updated to a firmware version that forces users to register for a cloud service, allowing Cisco to monitor their network use, and ultimately shut down the cloud service account and thus render the affected router unusable. Cisco has been found to have built in a backdoor to all of their routers that connect them to the NSA's PRISM program of surveillance. According to the German magazine Der Spiegel the NSA has developed JETPLOW for gaining access to ASA Cisco series 5505, 5510, 5520, 5540 and 5550 and 500-series PIX Firewalls. The National Security Agency's Tailored Access Operations (TAO) unit and other NSA employees intercept servers, routers and other network gear being shipped to organizations targeted for surveillance and install covert firmware onto them before they're delivered. These Trojan horse systems were described by an NSA manager as being "some of the most productive operations in TAO.

Initially the Network Access Points were controlled and operated by Cisco Systems in conjunction with DARPA and the National Security Agency. CERN is Europe's oldest and largest Network Access Points used by the rogue faction of the U.S. Central Intelligence Agency for surveillance of foreign countries and their citizens. CERN also coordinates the work of Onyx, the Swiss intelligence gathering system maintained by the Federal Intelligence Service of Switzerland. The mission of Onyx is to monitor both civil and military communications via telephone, fax, internet traffic and satellite communications. Onyx uses lists of keywords to filter the intercepted content for information of interest. Onyx coordinates the work of other collection centers like Zimmerwald, Heimenschwand and Leuk. CERN is a Network Access Point for surveillance for the ECHELON spy system. ECHELON is a surveillance program (signals intelligence / SIGINT collection and analysis network) operated on behalf of the five signatory nations to the UKUSA Security Agreement— Australia, Canada, New Zealand, the United Kingdom and the United States. The program was created in the late 1960s to monitor the military and diplomatic communications of the Soviet Union and its Eastern Bloc allies during the Cold War, and was formally established in 1971. By the end of the 20th century, the system referred to as "ECHELON" had allegedly evolved beyond its military and diplomatic origins, to also become "…a global system for the interception of private and commercial communications."

What the fuck am I looking at?

Anonymous 03/07/17 (Tue) 18:13:37 ID: 081118 No.9440561

Britain's The Guardian newspaper summarized the capabilities of the ECHELON system as follows: "A global network of electronic spy stations that can eavesdrop on telephones, faxes and computers. It can even track bank accounts. This information is stored in ECHELON computers, which can keep millions of records on individuals. Officially, however, Echelon doesn't exist." In 2000, James Woolsey, the former Director of the U.S. Central Intelligence Agency, confirmed that U.S. intelligence uses interception systems and keyword searches to monitor European businesses. Some of the systems used to accomplish these tasks at CERN include: ADVISE: (Analysis, Dissemination, Visualization, Insight, and Semantic Enhancement) is a research and development program within the United States Department of Homeland Security (DHS) Threat and Vulnerability Testing and Assessment (TVTA) portfolio. It is developing a massive data mining system which collects and analyzes data on everyone in the United States and performs a "threat analysis" of them. The data can be everything from financial records, phone records, emails, blog entries, website searches, and any other electronic information that can be put into a computer system. Boundless Informant: NSA system to analyze global electronic information. BULLRUN: NSA program to preserve its ability to eavesdrop on encrypted communications. Carnivore: FBI system to monitor email and electronic communications. DCSNet: FBI surveillance system that can perform instant wiretaps on any telecommunications device. Fairview: A mass surveillance program directed at foreign mobile phone users. Financial Crimes Enforcement Network: A bureau of the Department of the Treasury that collects and analyzes financial transactions in order to combat financial crimes. ICREACH: Surveillance that is shared with 23 government agencies, including the CIA, DEA, and FBI, to search illegally collected personal records.

Anonymous 03/07/17 (Tue) 18:14:14 ID: 081118 No.9440566

.
Magic Lantern: A keystroke logging software deployed by the FBI in the form of an e-mail attachment. When activated, it acts as a trojan horse and allows the FBI to decrypt user communications. Main Core: A personal and financial database storing information of millions of U.S. citizens believed to be threats to national security. MAINWAY: NSA database containing metadata for hundreds of billions of telephone calls made through the four largest telephone carriers in the United States. MUSCULAR: Overseas wiretapping of Google's and Yahoo's unencrypted internal networks by the NSA. MYSTIC: NSA voice interception program. PRISM: NSA electronic surveillance program which can target customers of participating corporations outside or inside the United States. Sentry Eagle: Program to monitor and attack an adversary's cyberspace. Special Collection Service (SCS): It employs covert listening device technologies to bug foreign embassies, communications centers, computer facilities, fiber-optic networks, and government installations. Stellar Wind: The name for four surveillance programs in one. Tailored Access Operations: Intelligence-gathering unit of the NSA. Turbulance: NSA information-technology project. It includes offensive cyberwarfare capabilities, like injecting malware into remote computers. US Intelligence Community (IC): A cooperative federation of 16 government agencies working together, but also separately, to gather intelligence and conduct espionage. Utah Data Center: The Intelligence Community's US$1.5 billion data storage center that is designed to store extremely large amounts of data. CERN is the European Data Center. X-Keyscore: NSA system for searching and analyzing internet data about foreign nationals. Information Awareness Office: An office established to bring together several DARPA projects focused on applying surveillance and information technology to track and monitor terrorists and other threats to U.S. national security. ThinThread: NSA program involving wiretapping and sophisticated analysis of the resulting data. Trailblazer Project: NSA program intended to develop a capability to analyze data carried on communications networks including cell phone networks and the Internet. Miami and its CERN-like Network Access Point Miami's Network Access Point, located in central Miami, is called "The Cube". It is the Network Access Point (NAP) of the Americas, one of the world's largest data centers, which redirects most of the digital information that comes from Latin America. About 90% of data traffic from Central and South America passes through the south Florida facility before continuing to its final destination. The NAP is, in short, one of the internet's brains – facilitating people's online activity. There are 18 data centers around the world which play an important role in global digital communications. Security measures are especially strict at the NAP, and it is rare to be granted access.   The Cube, unlike other data centers, rents its equipment and space to private and public customers, so that they can share information between them. To prevent any service interruptions, the walls have
seven inch thick, steel-reinforced concrete exterior panels in a hidden-from-sight building that does not have windows. Does the secretive description of the Cube NAP sound familiar? It sounds like what CERN brags about and says it is a leader in – data mining, surveillance, and housing the largest set of Cisco routers in Europe.

Probably the metadata footprint would give those things away.

If they did it in public spaces and newschannels or other things it would kinda explain trump's posture on some of his texas appearings when he was touring for the election.

Interestingly enough, if they combine all those tools into a single program, that would make MKU the perfect blackmail tool.

Don't you think that would be the basis of the so called democracy?

Haven't you read the army papers that explained how they targeted first those with more influence and go building a base of consensus into their meme by just forcing the content without explaining the technique?

This may even be the MO.

Anonymous 03/07/17 (Tue) 18:14:44 ID: 081118 No.9440572

CERN is nothing more than a hub for the World Wide Web PRISM data mining.

This is the true agenda of CERN – the "discovery" and "creation" of the World Wide Web. CERN is hidden from sight and as secure as possible in a country that is notorious for keeping secrets. CERN has discovered nothing and is only good for collecting data and analyzing it. Such far-fetched discoveries as CERN's recent analysis that "classical music exists in the fifth dimension and humans cannot go there" is just one of the ridiculous "discoveries" that the CERN super computers have been working on. This is, of course, complete hog-wash; any spiritual researcher could have concluded as much in far less time and money. Let's Review the False Flag of All Time CERN is the justification for the continued "mad science" that is conducted by theorists who have wasted trillions on big bang nonsense and particle physics that only leads to nuclear weapons.
CERN is run by Warlord Bankers from Geneva which is the home of the New World Order through the United Nations and the IMF, BIS, WCC, etc. CERN discoveries are fake and not supported by other colliders, NASA, NSA, and many other scientists worldwide. CERN does not have 17 miles of tunnels because there is no evidence they were ever built and the photographs of CERN machines show that they are not connected to the accelerator. The machines are not in sterile environments and use the laboratory space for large gatherings, dancing, photo-ops, and education. CERN's data could easily be produced by computer simulations and it is not repeatable at other facilities. CERN is a hoax, using its own definition of an internet hoax through claiming authority via association, large numbers of scientists supposedly involved, and a critical life and death issue at the heart of the hoax. CERN has collected trillions of currency units from multiple countries and yet only appears to have spent billions or even millions. The budgets are shared out between five French cities, two Swiss cities, CERN itself, and many subsidiary organizations. This certainly begs the question: Where is all the money going? CERN is one of the original Network Access Points because it set up the source code for establishing the World Wide Web and it is the largest NAP in Europe for surveillance and data collection for the Swiss and French governments, and ECHELON. There are many systems of surveillance coordinated through CERN including Onyx, ECHELON, PRISM and other similar DARPA and In-Q-Tel programs. CERN is economically supported to find discoveries that can be weaponized – atomic bombs, nuclear energy, etc. CERN claims to be the most dangerous machine scientists have ever built. There are no good reasons to continue splitting atoms with a quark cannon. CERN is based upon the efficacy of the big bang theory which is completely incorrect. Thus, CERN's research is a fraud. CERN cannot prove anything because its basic assumptions are false and inconclusive, based on consensus rather than authentic, reproducible scientific research. CERN fraudulently "discovered" the Higgs-Boson particle. Many non-CERN scientists say that CERN has discovered nothing and that all particle physics descriptions of atoms are completely theoretical and that other theories seem more viable and provable. There are four other accepted theories that supplant the big bang theory. Thus, other theories make CERN and all atom smashers obsolete and a dinosaur of science. Essentially, a complete waste of time, money and energy, much like the ghost cities built in China—just a way to hide or launder money or infuse the dwindling base of the global financial Ponzi scheme with much-needed cash. CERN plans to build another atom smasher ten times bigger than the current one that is already the largest in the world. This time, it will be built completely in Switzerland so the warlord bankers can capitalize on an even bigger money laundering or Ponzi scheme.

You can play emulators, retroarch, psp, dolphin or download gog games for linux, and even have steam but could have problems in some distros

But is easier you let the windows for games and normie things, emails, who you don't care for spy

And use some linux distro based in ubuntu made in LXDE or MATE and edit the browsers, wallpaper, icons, install extensions in your browsers, make everything and then download the program pinguybuilder.deb and install this to create a .iso backup of the whole systyem who you can burn in some flash usb driver in windows using "rufus" or linux using "startup disk creator". Or you can burn this .iso in some DVD.

And you put your flash usb driver or DVD with linux even in notebook or desktop without hard disk (But you don't need to reove your hard disk if you want to use this linux live usb or live cd/dvd in the same computer who have a hard disk with windows), Live CD linux working everything in memory ram

You don't need to abandom windows for things who you don't care to have spy and that you know that CIA will not steal your bank account, they will use this only in emergency for other things againsat you if you become a treat for them.

>Flash Bang is a tool designed to be able to migrate from a browser process (using sandbox breakout), escalate privileges, and memory load a NOD Persistence Spec dll. To do these things Flash Bang is broken into two parts: FlashBangLoader.dll and FlashBang.dll. FlashBangLoader.dll runs from within the browser process for the duration of execution. FlashBang.dll is written to disk and never runs from within the browser. When loaded into the browser process (Fire and Forget Spec), FlashBangLoader.dll writes FlashBang.dll to disk and then uses the PEULinkedIn_x86x64 privilege escalation module to break out of the sandbox and escalate privileges. Once the tool escalates privileges, it memory loads a NOD Persistence spec dll.

>>9440819
Here's a quick rundown:

-NSA bow to CIA

-In contact with aliens

-Possess psyop-like abilities

-Control france's election with an iron but fair fist

-Own blacksites & safehouses globally

-Direct descendants of the proto-50's-alphabet agencies.

-Will bankroll the first wars in south america (Cuba will be be the first crisis)

-Own 99% of information editing research facilities on Earth

-First MKULTRA babies will in all likelihood be CIA babies

-both the CIA and NSA said to have 215b budget, such intelligence agencies on Earth has only existed deep in Russia facilities in Moscow

-Ancient Snowden scriptures tell of two factions who will descend upon Earth and will bring an era of spy and unprecedented information control progress with them

-They own Cyberwarfare R&D labs around the world

-You likely have the CIA spying on you right now

-The CIA are in regular communication with the Illuminati and Council of 13, forwarding the nasty anime futa you jack off to the AQUILAS project mainframe AI. Who do you think set up the meeting between the director of the CIA and the NSA (First meeting between the two organisations in over 10 years) and arranged the NSA leader's first trip to Antarctica in history literally a few days later to the CIA consulate in Germany?

-They seized control of the French in under a week

-Know where nation states entrust their gold reserves. There's no gold in Ft. Knox, only CIA's offshore accounts.

-The organizations are about 4 decades old, from the data-time reference point of the base human currently accepted by our technology.

-In reality, they are timeless organizations existing in all points of data and information from the cold war to the fabric of the society we operate. We don't know their ultimate plans yet. We hope they're benevolent organizations.

Literal wizard here. 32 years old. Kissless virgin. Ate tendies today. I possess several magickal tomes, and have preferred using it to make me a better CSGO player.

It seems obvious we must shift our meming into overdrive, brothers. We need to meme harder than we've ever memed. It's easy to forget how powerful we are. Like in Eastern religions, we are gods playing at being human beings; we make ourselves suffer as a joke.

I will establish game rules. It's important to use tactics you enjoy. If you use them, you'll wield wondrous sorcery. If you don't use them, or think this is all malarky, that's your decision--but don't come crying to me when you're low on mana in the memepocalypse.

1. This is a huge opportunity for us. For me. For--you. We can change the world. The possibilities are boundless. I write this from an assertive, authoritarian perspective, yet I have no more authority or right than anyone else to assert myself. Changing the world is a big responsibility, yet paradoxically you must treat it with the highest degree of irresponsibility. When everyone is equally--powerful--we're free to be ourselves, whatever we are, and go unhindered into the cryptic dark. The biggest constraint is ourselves. Our ego. We've grown up having authorities like teachers and parents reward and punish with food, entertainment, and comfort so we can become conditioned robots. Notice how the authorities gave you what you wanted--after you gave up your--true will. We have to enjoy discomfort with the biggest of grins. Whenever someone wants to reward us with the old joys, we must throw it in their faces. We must have our own rewards. If we meme well, celebrate with your favorite tendies, or tendy surrogate just-as-good, like pizza or ice cream. Despise the free lunch, you fags.

2. Society looks at us like a joke, or it doesn't see us at all. Fine. If they don't realize what we are, what they can be, it means they're ripe for destruction. Fuck em.

3. Post original content, or content you rarely see. Be honest. You CAN post things you've seen before, especially if they're things that cause a verifiable emotional reaction, like a grin or a belly laugh. If you want to post old memes, you can, but realize the more you do it, the more you hurt the cause, the less free floating energy exists and the less change can happen. Did you think this was easy, faggot?

4. Store your meme folder non-locally if possible. You wouldn't to lose. damage, or delete it, would you?

5. Do not lust after dubs, trips, quads, etc. Do your best with each post. Consider how your post affects the person reading it. Self-indulgent posts suck. Consider your brothers's interests and proclivities. In other words, if you can't be interesting, BE FUNNY. The winning formula for humor is setting up an expectation and shattering it in a memetic way. For example,

>Hey, guys, I graduated from college today.

That's cool, Anon. What job are you gonna get now?

>I'm going to LARP as a frog on 8chan.

(You)s are a currency; a high score.

6. If we DON'T play this game well, we're going to go quietly into the night. We won't have war stories to tell our kids when we lose our virginity. Being old and having a VR waifu suck us off doesn't seem like a good way to go out.

7. Don't stick to one chan. Go anywhere. Reddit. 4chan. Facebook. Be original, be funny, be sarcastic, be subversive, be patient.

That's how we'll win, boys. The power is in your hands.

From the weakness of the mind, Omnissiah save us.
From the lies of the Antipath, circuit preserve us.
From the rage of the Beast, iron protect us.
From the temptations of the Fleshlord, silica cleanse us.
From the ravages of the Destroyer, anima shield us.
From this rotting cage of biomatter, Machine God set us free.
There is no truth in flesh, only betrayal.
There is no strength in flesh, only weakness.
There is no constancy in flesh, only decay.
There is no certainty in flesh but death.
Cast away the flesh!
Escape the prison of meat!
Find freedom in the holy purity of the machine!

So, does this make us Tech Priests?

>they specifically target regular Americans
Every bit of this is for internal domestic use against their political enemies or governments. It must enrage them when the God Emperor
tells them he's going to destroy their ISIS proxy terrorist army.

I honestly think it's about small arms proliferation in America.
The biggest army that poses a threat to the establishment is the armed American populace.
Piss off enough people and millions of Americans could clean house in a week.
The disruptions and psychological spy games are attempts to prevent Americans from getting the ball rolling on meaningful change

Anonymous 03/07/17 (Tue) 19:15:35 ID: 9d26c4 No.9441176

Anonymous 03/07/17 (Tue) 20:20:09 ID: f421d0 No.9441784

This is clearly where the Sassy Cat pic originally was saved from.
████incolors.club/collectionsdwn-sassy-cat.htm
It's the first one. It's not loading for me, but if you click it you go to:
████resizeandsave.online/openphoto.php?img=http://ohmygodcats.com/wp-content/uploads/2014/02/Sassy-Cat-Pic-640x607.jpg
If you try to download the pic from that page it gives you a 504. Some panicked hothead trying to clean up their trace?

Wait. Strange. It showed up in the page a moment ago. I tried to download it. 504. Now I go to the search page again and the image is gone. Maybe the server realized that the image might not be there because of the error and removed it from the results or something. I'm not too tech literate.

You know. There's a story that's been floatin about in my head for a while now. But not sure what inspired it.

Humans in the past get kidnapped and enslaved by aliens for use as slaves and soldiers.
They turn on their alien masters and kill them.
Then they find Earth and decide to just leave the homeworld be while keeping an eye on it until eventually they can't ignore the shit going on here any more and begin to intervene.

It would explain so much.
Ancient aliens were real but they fucked off with their prize.
Now our lost kin are back

A letter to American intelligence - A PROVEN ENEMY OF THE UNITED STATES

After seeing what you did to President Trump it is time for me to post this

I am a patriot. I want America to be great again. Not your type of great, where you suck a fat paycheck off the backs of hard working Americans and then turn around and stab them by stealing their secrets and selling them to the highest bidder. If you are too stupid to know your agencies do that, you suck at your job, compartmentalized clearance or not.
President Trump has what I believe is a flawless plan to make America great again. He has proven time and time again that he knows how to run a business which is harder than running a government, when that government is attempting to parasite suck everything out of business that it possibly can. Donald Trump prevailed in spite of you. He'd clearly wipe out America's problems if he was permitted to.

I don't care what agency you are in, ALL members of the intelligence apparatus are enemies of the United States. This may sound like an audacious statement, but it is a fact that is very easy to prove, in MANY different ways with countless examples.

File: dc75f0dbb9d0e16□.png (325.5 KB, 574x813, 574:813, 1470703422510.png)

>>9441911
https://www.youtube.com/watch?v=q0z08OpmEPc

1. It does not matter what agency you work for, you are a proven enemy of the United States because you never came clean on 911. Trump gets a pass on this because he knows the truth about 911, a fact clearly shown by him stating the buildings were demolished, But he can't come out in the open with it at this point because it is political suicide.
2. It does not matter what agency you work for, you are a proven enemy of the United States because it is your job to discover the reason for autism, yet every time anyone gets close to the truth about intentionally destructive vaccines you either kill them or sideline them, all the while you plant hoax explanations like glyphosate and anal bacteria. You are a hive of mentally malfunctioning trash and an enemy of the United States if that is all you can accomplish.

3. It does not matter what agency you work for, you are a proven enemy of the United States because no agency has ever come clean on a single false flag, and WE KNOW you have the details on ALL OF THEM.

4. You are a proven enemy of the United States because you allowed the universities to get over run by subversives and never did a single investigation into why America's education at all levels has fallen apart, and you never did a thing to stop it. YOUR JOB IS TO PROTECT THE UNITED STATES. If you just stood by while that happened and allowed subversives to destroy that key function of any healthy nation, you are an enemy of the people.

5. You are a proven enemy of the United States because you have direct access to ALL telecommunications, and never blew the whistle when they suddenly were all routed through Israel. That's a serious national security breach. Why did you do nothing to stop it? Did you really believe it was correct to never question anything when over 97 percent of America's communications became Israeli/Jewish owned? What about the anti trust laws? Why were they never applied?

6. You are a proven enemy of the United States because you never did anything to stop Bill Gates, while he stole the code from Word Perfect, Stacker, and many many other truly American software companies and simply put it into his products for "free" as long as you bought the operating system. Bill Gates ripped the guts out of the American software business, while you just sat there and did nothing as he subsequently coerced all PC manufacturers to only carry Microsoft operating systems. If computer manufacturers like Dell or Compaq EVER in ANY CASE put out a PC with a competing operating system on it, Microsoft, which was a dominant player, would forever deny licensing for Microsoft products, and therefore kill whoever dared to step out of line and break the Microsoft monopoly. You can't tell me you did not know that happened, WHY DID YOU LET IT HAPPEN?

As a result, the vast majority of the population is now funneled into a crappy Windows 10, which CLEARLY steals everything anyone ever does with it. Your failure to stop this type of monopoly with Bill Gates and others, such as Facebook and Google, proves beyond the faintest shadow of a doubt that you are an enemy of the American people.

7. It does not matter what agency you work for, you are an enemy of the American people because you stood by while the family courts short circuited due process and flushed countless men into oblivion with rulings that had far more damning and damaging outcome than virtually all punishments for true criminals. You probably ran the "deadbeat" psy ops that guilted men into letting it happen to boot! Because you never did anything to stop these courts, and never conducted a single investigation into who set them up, all the while they more than ripped the fabric of America to shreds, you are an enemy of the American people, that should be dragged through the streets and lynched.

8. You are an enemy of the American people because you stood by and did absolutely nothing to stop child protective services in all states from snatching children and selling them on the international markets via corporations such as DynCorp. There is no conceivable way you can make a case that with all the surveillance power you have, you did not know that was going on.

9. It does not matter what agency you work for, you are an enemy of the United States because you allowed pedophilia and child killings to prevail at all levels of government, all through Hollywood, and all through the Jewish community and other religions that are infected with luciferians, including even the Mormons. So it seems like you yourselves are aligned with Satan, because there is absolutely no way you can make the case you do not know what is going on. Even now, you are doing everything you can to protect these evil people at all levels, and this alone proves you are a cold hearted enemy of the American people.

>>9439805

a carbed chevy 305 can easily get 20mpg, sometimes even better depending on how you set everything up. Easier to keep operating for longer too.

NEED I SAY MORE? Perhaps so.

10. It does not matter what agency you work for, you are a proven enemy of the American people because you never uttered a peep about the rigged elections, and you can't tell me you do not know. You cannot tell me you do not know that President Trump took this election by such an enormous landslide that all your efforts to stop it failed. I guessed that maybe white hats in intelligence prevented a steal, but your subsequent behavior makes me doubt that. No, you are a standing enemy of the American people because you are a clear enemy of a more than duly elected President, who has worked hard to:
1. Stop child trafficking

2. Stop the destruction of education.

3. Stop the destruction of the children via obviously sabotaged vaccines.

4. Secure America.

5. Stated false flags are a reality and must be stopped.

6. Stop the pedophiles.

7. Stop election fraud.

8. Crack down on monopolies and apply the anti trust laws.

Being 8/10 already, so early in his presidency on these 10 issues alone proves Trump is a true patriot that wants to Make America Great again, and I did not even mention the evil and seditious press, which he is fighting tooth and nail.

BOTTOM LINE: I WAS ONCE WITH YOU, AMERICAN INTELLIGENCE, BUT SEE YOU FOR THE MONSTER YOU ARE. WANT ME TO GO ROGUE? I'LL GO MORE THAN ROGUE. I STRONGLY ENCOURAGE ALL PEOPLE WHO WORK FOR ANY AMERICAN INTELLIGENCE AGENCY (AND HAVE A CONSCIENCE) TO RIP ITS GUTS OUT BY COMING OUT IN THE OPEN AND TELLING ALL. FORGET YOUR FAT PAYCHECK. YOUR AGENCY IS A PROVEN ENEMY OF THE PRESIDENT OF THE UNITED STATES, AND THEREFORE AN ENEMY OF THE AMERICAN PEOPLE. DO YOU REALLY WANT TO FILL THAT ROLE?

I stand behind President Trump 100 percent. He's not perfect, but he is MY PRESIDENT, and the best hope America has. There will never be a better hope, and when I see these intelligence agencies working overtime to destroy that hope it makes my blood boil, DEAR AMERICAN INTELLIGENCE: YOU LOST MY LOYALTY LONG AGO, you simply cannot continue to act as an enemy of the American people and have my mouth stay shut on ANYTHING ANY LONGER.
I know about the CIA Wikileaks. If they are for real, all I can say is GOOD.

>>9441886
I still have version from before it was compromised. When you had hidden containers than could not be detected. They changed that and everybody knew CIA or NSA was involved.

Seconding the recommendation to use mpv.
Especially now that they have added display syncing and interpolation. No other player comes close. Great keyboard controls too.

Settings for smoothmotion
–video-sync=display-resample #syncs video with computer monitor
–interpolation #enables interpolation aka smoothmotion. makes the video buttery smooth
–tscale=sinc #sets the timescale. Not sure which is best. List found via –tscale=help

Still not risk free. I know from experience that some ECUs cannot be near and UHF radio systems, they malfunction from interference
otherwise. I know this is so for 80s cars too and probably all cars. The Feds can conjure up radio waves if they like.

the great pyramid was not a burial chamber it is actually stargate to the Cydonia Region of Mars. The Sphynx, for example is much older than Egyptologists care to exist based on erosion as analyzed by geologists. It wasn't aliens but ancient astronauts using technology lost in the great flood. This is also related to the lost city of Atlantis and similar pyramids all over the world. Governments everywhere are hiding the truth.

Obama: Donald is crazy, what the hell could we possibly wanna tap

Biden: Melania

Obama: Joe seriously

Was wondering what the lefties think about all of this and I run into attached pic. Everything is fine, nothing bad is happening.

Anonymous 03/07/17 (Tue) 21:27:54 ID: 000000 No.9442209

I'm wondering what all this means in the real world for insurance companies that have underwritten policies to all these companies using vulnerable computers and networks. Do they cancel all of them before something inevitably happens (i.e., failed projects, hacked data, preventable deaths), or do they just go along trying to pretend everything is fine? What about defense attorneys? Every case where a cellphone is used as evidence has reasonable doubt. Hell, every judicial and police computer network is compromised, so basically every electronic chain of evidence is broken. This goes a lot deeper than memes and bronies.
