MEMORANDUM FOR: Chief, Records System Branch, RMD/OIA  
FROM:   
Special Assistant to the Inspector General  
SUBJECT: National Security Classification Guide

25X1

25X1

1. Enclosed is your preliminary draft of a CIA National Security Classification Guide. I have pencilled in a number of questions and comments about specific items.

2. Concerning the draft Guide itself:

a. Many of the topics, which are listed as unclassified, are classified in themselves. I have circled the (U) at the end of the statement in many cases.

b. Many of the topics are so narrowly defined as to lead an employee to believe that, if the information does not specifically fit the guide item in every respect, then its classifiability is questionable.

c. Some of the review periods are less than the allowable 20 years. It is questionable that we should require review at a shorter period.

d. Some of the classification levels are arbitrary for the general class of information described. This could be artificially and improperly limiting.

e. Major topics are missing from this Guide: medical, security clearance data, collection tasking, intelligence management information, oversight information, intelligence policy, etc., are but a few of the many major topics not touched on at all in this Guide.

f. CIA need not concern itself with justifying the classification of US foreign policy or military data. This is a State, DoD, or DOE responsibility and our protection of this information is based on their standards of classification.

All portions are  
classified SECRET

25X1

SECRET

25X1

3. A classification guide which would "facilitate the proper and uniform classification of information" in the Agency (as required by Para II of [redacted] should, in my view, describe what type of information can be released in an unclassified form. Guidance to all employees on this topic is far more important for effective security of Agency equities and capabilities than arcane distinctions between Secret and Confidential or between a 15 or 20 year review period. Why can't the Agency have a classification guide based on the criteria in Annex A of your draft amplifying for each criteria the distinctions between classified and unclassified information.

4. This type of Guide, while addressing the specific E0 12065 requirement for a mandatory review guide, may be the wrong approach to the problem of providing classification guidance to Agency employees. The Agency should take full advantage of its statutory and E0 12065 authorities to protect its information. An entirely different security philosophy should be considered - everything concerning the Agency is classified except that which is specifically declassified.

25X1

As Stated

8 May 1981

STAT NOTE FOR: [redacted]  
Management Staff, DDA.

SUBJECT: Agency-wide Classification Guide

STAT [redacted]

STAT 1. [redacted] has raised some questions concerning the portion marking contained in the classification guide published by this Office. The thrust of his comments on whether the Agency needs to publish a classification guide ties in with this memorandum from Chuck Briggs to the A/DCI.

STAT 2. OIS has scheduled a meeting for 19 May to which we have invited representatives from all the Directorates (and some of the Offices) as well as [redacted]. The meeting will give [redacted] a chance to present his views before the "substantive experts" who have already coordinated on the classification guide during its development. We are ready to circulate the guide for formal coordination, but will delay doing so until after the meeting on 19 May so that we may give [redacted] the opportunity to present his views. Consequently, I do not believe that the question of policy guidance from EXCOM on the classification guide is really necessary. We have been working with representatives from all the Directorates and Independent Offices during the entire development of the draft guide as it now exists. All representatives believe that it is a great improvement over what we have worked with heretofore. STAT

STAT 3. If we are unable to "turn off" the classification guide issue as an EXCOM topic, then Tom White as the Director of Information Services would accompany Mr. Fitzwater to the EXCOM meeting in order to make a presentation and answer questions concerning the guide.

4. The only major decision item which might be surfaced at the EXCOM meeting would be whether to have a guide or to abandon this work altogether. The new guide will serve a very useful purpose to CIA. It will replace four guides (one for each Directorate) which were developed by the Directorates for their own use. The DCI Area and IC Staff have no guide and must rely on what-

ever they can glean from the guides of the other Directorates. Thus, the new guide will consolidate the rather haphazard approach taken in the past and provide consistency for classification purposes throughout the Agency. In the view of those who have participated in the guide's development, it will continue to serve a useful purpose in the future regardless of what revisions may ultimately be made to E.O. 12065.

5. Please call me if you have any further questions.

Acting Director of Information Services

Basically, I need to know if this is a viable EXCOM topic, specifics of the presentation (who, when, etc.) and major decision items which might be surfaced.

Also, recruitment study is attached for your information as requested.

MEMORANDUM FOR: Acting Director of Central Intelligence

FROM: Charles A. Briggs  
Inspector General

SUBJECT: Briggs' Corollary to Murphy's Law

1. The explanation of subject, well known to my colleagues who deal with FOIA and declassification matters is: "If there is even the remotest chance that we can shoot ourselves in the foot, not only will we, but we will be intent upon it."

2. The Agency has underway an effort which I have to support in principle, namely, development of an Agency-wide National Security Classification Guide. However, efforts to date reflect an in-house schizophrenia re current tactics. The CIA Act of 1949 allows us to withhold any budget data, employee names or organizational details. The FOIA, Privacy Act and executive orders on classification have allowed various exemptions which, in our implementing documents, we chose to apply only in part -- for tactical reasons -- while we were re-gaining our credibility.

3. Having been lucky enough to have signed a great many affidavits, denying information in FOIA/PA cases, I am keenly aware of the need to avoid arbitrary and capricious actions; I also believe it is time to staunch hemorrhaging.

4. Dating back to the Schlesinger era, we have considered DDI (NFAC), DDA and DDS&T organization titles, and most employees in NEAC and S&T, overt, therefore information about them, including their names, releasable. We have released internal CIA regulations, even Community security procedures manuals, because they were considered unclassified. The current draft of the Agency-wide National Security Classification Guide has line items, individually called Unclassified, which discuss methodology, which, along with source protection, is also classifiable -- or at least controllable as to dissemination. I submit that we can be smarter than this.

ALL PORTIONS OF THIS DOCUMENT  
CLASSIFIED CONFIDENTIAL

25X1

~~CONFIDENTIAL~~

~~CONFIDENTIAL~~

5. I suggest that the compilation of a clear and concise in-house Guide continue, to permit desirable cross-directorate consistency but that the drafters get some current policy guidance. I've discussed this in general with the DDA, who agrees with the principle. I suggest that ExCom address the classification/control issue.

*CONFIDENTIAL*

THE GUIDE AND ITS USE (U)

I. GENERAL (U)

The CIA National Security Classification Guide (NSCG) is arranged alphabetically by subject (see Table of Contents) and establishes uniform classification durations for frequently reoccurring items of national security information [redacted]

ILLEGIB

[redacted] by the Director of Central Intelligence. (U)

Citing the NSCG is known [redacted] and the classification level and duration specified [redacted]

ILLEGIB

ILLEGIB

[redacted] The classification duration of documents or materials classified under the authority of the NSCG will begin with the date of the origination of the document or material being classified.<sup>1</sup> (U)

ILLEGIB

<sup>1</sup>When derivatively classifying from a document other than a classification guide, the date or event for review or declassification must be carried forward from the source document to the document you are classifying. (U)

SECRET

SECRET

II. AUTHORITY TO CITE THE GUIDE (U)

Authorized NSCG users are:

-Personnel who have or are occupying positions which have Top Secret, Secret, or Confidential national security classification authority (also known as "original" classification authority) and

-Personnel who have or are occupying positions which have derivative national security classification authority. (U)

A listing of all authorized users is maintained by the Office of Information Services, Records Management Division, Records Systems Branch.

All users must be approved by Operating Officials or high<sup>er</sup> level officials

who also have Top Secret classification authority (see  for additional details). (U)

EXECUTIVE ORDER \_\_\_\_\_  
NATIONAL SECURITY INFORMATION

This Order prescribes a uniform system for classifying, declassifying, and safeguarding national security information. It recognizes that it is essential that the public be informed concerning the activities of its Government, but that the interests of the United States and its citizens require that certain information concerning the national defense and foreign relations be protected against unauthorized disclosure. Nothing in this Order limits the protection afforded any information by other provisions of law.

PART I

ORIGINAL CLASSIFICATION

SECTION 1.1 Classification Levels.

(a) National security information (hereinafter "classified information") shall be classified at one of the following three levels:

(1) "Top Secret" shall be applied to information, the unauthorized disclosure of which reasonably could be expected to

cause exceptionally grave damage to the national security.

(2) "Secret" shall be applied to information, the unauthorized disclosure of which reasonably could be expected to cause serious damage to the national security.

(3) "Confidential" shall be applied to information, the unauthorized disclosure of which reasonably could be expected to cause damage to the national security.

(b) Except as otherwise provided by statute, no other terms shall be used to identify classified information.

(c) If there is reasonable doubt either about the need to classify information or about which classification level is appropriate, the information shall be considered classified and shall be safeguarded as required for the higher level of classification under the provisions of this Order pending a final determination by an original classification authority.

SEC 1.2

Classification Authority.

(a) Top Secret. The authority to classify information originally as Top Secret may be exercised only by:

(1) the President;

(2) agency heads and officials designated by the President in the Federal Register; and

(3) officials delegated this authority under Section 1.2(d).

(b) Secret. The authority to classify information originally as Secret may be exercised only by:

(1) agency heads and officials designated by the President in the Federal Register;

(2) officials with original Top Secret classification authority; and

(3) officials delegated such authority pursuant to Section 1.2(d).

(c) Confidential. The authority to classify information originally as Confidential may be exercised only by:

(1) agency heads and officials designated by the President in the Federal Register;

(2) officials with original Top Secret or Secret classification authority; and

(3) officials delegated such authority pursuant to Section 1.2(d).

(d) Delegation of Original Classification Authority.

(1) Delegations of original classification authority shall be limited to the minimum required to administer this Order. Agency heads are responsible for ensuring that designated subordinate officials have a demonstrable and continuing need to exercise this authority.

(2) Original Top Secret classification authority may be delegated only by the President; an agency head or official

DRAFT

Approved For Release 2005/12/01 : CIA-RDP93B01194R001200030007-9

designated pursuant to Section 1.2(a)(2); and the senior official designated under Section 5.3(a)(1), provided that official has been delegated original Top Secret classification authority by the agency head.

(3) Original Secret classification authority may be delegated only by the President; an agency head or official designated pursuant to Sections 1.2(a)(2) and 1.2(b)(1); an official with original Top Secret classification authority; and the senior official designated under Section 5.3(a)(1), provided that official has been delegated original Secret classification authority by the agency head.

(4) Original Confidential classification authority may be delegated only by the President; an agency head or official designated pursuant to Sections 1.2(a)(2), 1.2(b)(1) and 1.2(c)(1), an official with original Top Secret classification authority; and the senior official designated under Section 5-301(a), provided that official has been delegated original Secret

Approved For Release 2005/12/01 : CIA-RDP93B01194R001200030007-9

or Confidential classification authority by the agency head.

(5) Each delegation of original classification authority shall be in writing and shall not be delegated except as provided in this Order. It shall identify the official delegated the authority by name or position title. Delegated classification authority includes the authority to classify information at the level granted and lower levels of classification.

(e) Exceptional Cases. When an employee, contractor, licensee, or grantee of an agency that does not have original classification authority originates information believed by that person to require classification, the information shall be protected in a manner consistent with this Order and its implementing directives. The information shall be transmitted promptly as provided under this Order or its implementing directives to the agency that has appropriate subject matter interest and classification authority with respect to this information. That agency shall decide within thirty (30) days whether to classify this information. If it is not

clear which agency has classification responsibility for this information, it shall be sent to the Director of the Information Security Oversight Office. The Director shall determine the agency having primary subject matter interest and forward the information, with appropriate recommendations, to that agency for a classification determination.

SEC 1.3 Classification Categories.

(a) Information shall be considered for classification if it concerns:

- (1) military plans, weapons, or operations;
- (2) the vulnerabilities or capabilities of systems, installations, projects, or plans relating to the national security;
- (3) foreign government information;
- (4) intelligence activities (including special activities), or intelligence sources or methods;

DRAFT

Approved For Release 2005/12/01 : CIA-RDP93B01194R001200030007-9

(5) foreign relations or foreign activities of the United States;

(6) scientific, technological, or economic matters relating to the national security;

(7) United States Government programs for safeguarding nuclear materials or facilities;

(8) cryptology;

(9) a confidential source; or

(10) other categories of information that are related to the national security and that require protection against unauthorized disclosure as determined by the President or by agency heads or other officials who have been delegated original classification authority by the President. Any determination made under this subsection shall be reported promptly to the Director of the Information Security Oversight Office.

(b) Information that is determined to concern one or more of the categories in Section 1.3(a)

Approved For Release 2005/12/01 : CIA-RDP93B01194R001200030007-9

shall be classified when an original classification authority also determines that its unauthorized disclosure, either by itself or in the context of other information, reasonably could be expected to cause damage to the national security.

(c) Unauthorized disclosure of foreign government information, the identity of a confidential foreign source, or intelligence sources or methods is presumed to cause damage to the national security.

(d) Information classified in accordance with Section 1.3 shall not be declassified automatically as a result of any unofficial publication or inadvertent or unauthorized disclosure in the United States or abroad of identical or similar information.

SEC 1.4 Duration of Classification.

(a) Information shall be classified as long as required by national security considerations. When it can be determined, a specific date or event for declassification shall be set by the original classification authority at the time the information is originally classified.

(b) Automatic declassification determinations under predecessor orders shall remain valid unless the classification is extended by an authorized official of the originating agency. These extensions may be by individual documents or categories of information. The agency shall be responsible for notifying holders of the information of such extensions.

(c) Information classified under predecessor orders and marked for declassification review shall remain classified until reviewed for declassification under the provisions of this Order.

SEC 1.5 Identification and Markings.

(a) At the time of original classification, the following information shall be shown on the face of all classified documents, or clearly associated with other forms of classified information in a manner appropriate to the medium involved, unless this information itself would reveal a confidential source or relationship not otherwise evident in the document or information:

- (1) the identity of the original classification authority if other than the person whose name appears as the approving or signing official;
- (2) the agency and office of origin;
- (3) the date or event for declassification, or the notation "Originating Agency's Determination Required"; and
- (4) one of the three classification levels defined in Section 1.1.

(b) Each classified document transmitted outside the originating agency shall, by marking or other means, indicate which portions are classified, with the applicable classification level, and which portions are not classified. Agency heads may, for good cause, grant and revoke waivers of this requirement for specified classes of documents or information. The Director of the Information Security Oversight Office shall be notified of any waivers.

(c) Marking designations implementing the provisions of this Order, including abbreviations, shall conform to the standards prescribed in implementing directives issued by the Information Security Oversight Office.

(d) Foreign government information shall either retain its original classification or be assigned a United States classification that shall ensure a degree of protection at least equivalent to that required by the entity that furnished the information.

(e) Information assigned a level of classification under predecessor orders shall be considered as classified at that level of classification despite the omission of other required markings. Omitted markings may be inserted on a document by the officials specified in Section 3.1(b).

SEC 1.6 Limitations on Classification.

(a) In no case shall information be classified in order to conceal violations of law, inefficiency, or administrative error; to prevent embarrassment to a person, organization, or agency; to restrain competition; or to prevent or

delay the release of information that does not require protection in the interest of national security.

(b) The President or an agency head or official designated under Sections 1.2(a)(2), 1.2(b)(1), or 1.2(c)(1) may re-classify information previously declassified and disclosed if it is determined in writing that (1) the information requires protection in the interest of national security; and (2) the information may reasonably be recovered.

(c) Information may be classified or re-classified after an agency has received a request for it under the Freedom of Information Act (5 U.S.C. 552) or the Privacy Act of 1974 (5 U.S.C. 552a), or the mandatory review provisions of this Order (Section 3.4) if such classification meets the requirements of this Order and is accomplished personally and on a document-by-document basis by the agency head, the deputy agency head, the senior agency official designated under Section 5.3(a)(1), or an official with original Top Secret classification authority.

DRAFT

## PART 2

### DERIVATIVE CLASSIFICATION

#### SEC 2.1 Use of Derivative Classification.

(a) Derivative classification is (1) the determination that information is in substance the same as information currently classified, and (2) the application of the same classification markings. Persons who only reproduce, extract, or summarize classified information, or who only apply classification markings derived from source material or as directed by a classification guide, need not possess original classification authority.

(b) Persons who apply derivative classification markings shall:

(1) observe and respect original classification decisions; and

(2) carry forward to any newly created documents any assigned authorized markings. The declassification date or event that provides the longest period of

DRAFT

classification shall be used for documents  
classified on the basis of multiple sources.

SEC 2.2 Classification Guides.

(a) Agencies with original classification authority shall prepare classification guides to facilitate the proper and uniform derivative classification of information.

(b) Each guide shall be approved personally and in writing by an official who:

(1) has program or supervisory responsibility over the information or is the senior agency official designated under Section 5.3(a)(1); and

(2) is authorized to classify information originally at the highest level of classification prescribed in the guide.

(c) Agency heads may, for good cause, grant and revoke waivers of the requirement to prepare classification guides for specified classes of documents or information. The Director of the

Information Security Oversight Office shall be notified of any waivers.

PART 3

DECLASSIFICATION AND DOWNGRADING

SEC 3.1 Declassification Authority.

(a) Information shall be declassified or downgraded as soon as national security considerations permit. Agencies shall coordinate their review of classified information with other agencies that have a direct interest in the subject matter. Information that continues to meet the classification requirements prescribed by Section 1.3 despite the passage of time will continue to be protected in accordance with this Order.

(b) Information shall be declassified or downgraded by the official who authorized the original classification, if that official is still serving in the same position; the originator's successor; a supervisory official of either; or officials delegated such authority in writing by

the agency head or the senior agency official designated pursuant to Section 5.3(a)(1).

(c) If the Director of the Information Security Oversight Office determines that information is classified in violation of this Order, the Director may require the information to be declassified by the agency that originated the classification. Any such decision by the Director may be appealed to the National Security Council. The information shall remain classified until the appeal is decided.

(d) The provisions of this Section shall apply to agencies that, under the terms of this Order, do not have original classification authority, but that had such authority under predecessor orders.

SEC 3.2 Transferred Information.

(a) In the case of classified information transferred in conjunction with a transfer of functions, and not merely for storage purposes, the receiving agency shall be deemed to be the originating agency for purposes of this Order.

(b) In the case of classified information that is not officially transferred as described in Section 3.2(a), but that originated in an agency that has ceased to exist and for which there is no successor agency, each agency in possession of such information shall be deemed to be the originating agency for purposes of this Order. Such information may be declassified or downgraded by the agency in possession after consultation with any other agency that has an interest in the subject matter of the information.

(c) Classified information transferred to the General Services Administration for accession into the National Archives of the United States shall be declassified or downgraded by the Archivist of the United States in accordance with this Order, the directives of the Information Security Oversight Office, and agency guidelines.

### 3.3 Systematic Review for Declassification

(a) The Archivist of the United States shall, in accordance with procedures prescribed in the Information Security Oversight Office's directives implementing this Order, systematically review for declassification (1)

DRAFT

classified records accessioned into the National Archives of the United States, and (2) classified presidential papers or records in the Archivist's possession and control. Such information shall be reviewed by the Archivist for declassification in accordance with systematic review guidelines that shall be provided by agency heads who originated the information, or in the case of foreign government information, by the Director of the Information Security Oversight Office in consultation with interested agency heads.

(b) Agency heads may conduct internal systematic review programs for classified information originated by their agencies contained in records determined by the Archivist to be permanently valuable but that have not been accessioned into the National Archives of the United States.

(c) After consultation with affected agencies, the Secretary of Defense may establish special procedures for systematic review for declassification of classified cryptologic information, and the Director of Central Intelligence may establish special procedures for systematic review for declassification of

DRAFT

classified information pertaining to intelligence activities (including special activities), or intelligence sources or methods.

SEC 3.4 Mandatory Review for Declassification.

(a) Except as provided in Section 3.4(b), all information classified under this Order or predecessor orders shall be subject to a review for declassification by the originating agency, if:

(1) the request is made by a United States citizen or permanent resident alien, a federal agency, or a State or local government; and

(2) the request describes the document or material containing the information with sufficient specificity to enable the agency to locate it with a reasonable amount of effort.

(b) Information originated by a President, the White House Staff, by committees, commissions, or boards appointed by the President, or others specifically providing advice and counsel to a President or acting on behalf of a President,

including such information in the possession and control of the Administrator of General Services pursuant to sections 2107, 2107 note, or 2203 of title 44, United States Code, is exempted from the provisions of Section 3.4(a). The Archivist of the United States shall have authority to review and declassify such information. Review procedures developed by the Archivist shall provide for consultation with agencies having primary subject matter interest and shall be consistent with the provisions of applicable laws or lawful agreements that pertain to the respective presidential papers or records. Any decision by the Archivist may be appealed to the Director of the Information Security Oversight Office. Agencies with primary subject matter interest shall be notified promptly of the Director's decision on such appeals and may further appeal to the National Security Council. The information shall remain classified until the appeal is decided.

(c) Agencies conducting a mandatory review for declassification shall declassify information no longer requiring protection under this Order. They shall release this information unless

withholding is otherwise authorized under applicable law.

(d) Agency heads shall develop procedures to process requests for the mandatory review of classified information. These procedures shall apply to information classified under this or predecessor orders. They shall also provide a means for administratively appealing a denial of a mandatory review request.

(e) The Secretary of Defense shall develop special procedures for the review of cryptologic information, and the Director of Central Intelligence shall develop special procedures for the review of information pertaining to intelligence activities (including special activities), or intelligence sources or methods, after consultation with affected agencies. The Archivist shall develop special procedures for the review of information accessioned into the National Archives of the United States.

(f) In response to a request for information under the Freedom of Information Act, the Privacy Act of 1974, or the mandatory review provisions of this Order:

DRAFT

(1) An agency shall refuse to confirm or deny the existence or non-existence of requested information whenever the fact of its existence or non-existence is itself classifiable under this Order.

(2) When an agency receives any request for documents in its custody that were classified by another agency, it shall refer copies of the request and the requested documents to the originating agency for processing, and may, after consultation with the originating agency, inform the requester of the referral. In cases in which the originating agency determines in writing that a response under Section 3.4(f)(1) is required, the referring agency shall respond to the requester in accordance with that Section.

#### PART 4

#### SAFEGUARDING

SEC 4.1 General Restrictions on Access.

DRAFT

(a) A person is eligible for access to classified information provided that a formal determination of trustworthiness has been made by agency heads or designated senior officials and provided that such access is essential to the accomplishment of authorized and lawful Government purposes.

(b) Controls shall be established by each agency to ensure that classified information is used, processed, stored, reproduced, transmitted, and destroyed only under conditions that will provide adequate protection and prevent access by unauthorized persons.

(c) Classified information shall not be disseminated outside the executive branch except under conditions that ensure that the information will be given protection equivalent to that afforded within the executive branch.

(d) Except as provided by directives issued by the President through the National Security Council, classified information originating in one agency may not be disseminated outside any other agency to which it has been made available without the consent of the originating agency.

DRAFT

This Section shall not be construed as reducing the authority of the Attorney General, with the advice of appropriate agency heads and subject to review by the President, to determine if the use of classified information is required to support legal proceedings. For purposes of this Section, the Department of Defense shall be considered one agency.

SEC 4.2 Special Access Programs.

(a) Agency heads designated pursuant to Section 1.2(a) may create special access programs to control access, distribution, and protection of particularly sensitive information classified pursuant to this Order or predecessor orders. Such programs may be created or continued only at the written direction of these agency heads. For special access programs pertaining to intelligence activities (including special activities but not including military operational strategic and tactical programs), or intelligence sources or methods, this function will be exercised by the Director of Central Intelligence. For special access programs pertaining to cryptology, this function will be exercised by the Secretary of Defense.

~~DRAFT~~

(b) Each agency head shall establish and maintain a system of accounting for special access programs. The Director of the Information Security Oversight Office, consistent with the provisions of Section 5.2(b)(4) shall have non-delegable access to all such accountings.

SEC 4.3 Access by Historical Researchers and Former Presidential Appointees.

(a) The requirement in Section 4.1(a) that access to classified information may be granted only as is essential to the accomplishment of authorized and lawful Government purposes may be waived as provided in Section 4.3(b) for persons who:

(1) are engaged in historical research projects, or

(2) previously have occupied policy-making positions to which they were appointed by the President.

(b) Waivers under Section 4.3(a) may be granted only if the originating agency:

(1) determines in writing that access is consistent with the interest of national security;

(2) takes appropriate steps to protect classified information from unauthorized disclosure or compromise, and ensures that the information is safeguarded in a manner consistent with this Order; and

(3) limits the access granted to former presidential appointees to items that the person originated, reviewed, signed, or received while serving as a presidential appointee.

## PART 5

### IMPLEMENTATION AND REVIEW

#### SEC 5.1 Policy Direction.

(a) The National Security Council shall provide overall policy direction for the information security program.

DRAFT

(b) The Administrator of General Services shall be responsible for implementing and monitoring the program established pursuant to this Order. The Administrator shall delegate the implementation and monitorship functions of this program to the Director of the Information Security Oversight Office.

SEC 5.2 Information Security Oversight Office.

(a) The Information Security Oversight Office shall have a full-time Director appointed by the Administrator of General Services subject to approval by the President. The Director shall have the authority to appoint a staff for the Office.

(b) The Director shall:

(1) develop, in consultation with the agencies, and promulgate, subject to the approval of the National Security Council, directives for the implementation of this Order which shall be binding on the agencies;

(2) oversee agency actions to ensure compliance with this Order and implementing directives;

(3) review all agency implementing regulations and agency guidelines for systematic declassification review. The Director shall require any regulation or guideline to be changed if it is not consistent with this Order or implementing directives. Any such decision by the Director may be appealed to the National Security Council. The agency regulation or guideline shall remain in effect until the appeal is decided;

(4) have the authority to conduct on-site reviews of the information security program of each agency that generates or handles classified information and to require of each agency those reports, information, and other cooperation that may be necessary to fulfill the Director's responsibilities. If these reports, inspections, or access to specific categories of classified information would pose an exceptional national security risk, the

DRAFT

affected agency head or the senior official designated under Section 5.3(a)(1) may deny access. The Director may appeal denials to the National Security Council. The denial of access shall remain in effect until the appeal is decided;

(5) review requests for original classification authority from agencies or officials not granted original classification authority and, if deemed appropriate, recommend presidential approval;

(6) consider and take action on complaints and suggestions from persons within or outside the Government with respect to the administration of the information security program;

(7) have the authority to prescribe, after consultation with affected agencies, standard forms that will promote the implementation of the information security program;

(8) exercise case-by-case classification authority in accordance with Section 1.2(e);

DRAFT

(9) report at least annually to the President through the National Security Council on the implementation of this Order; and

(10) have the authority to convene and chair interagency meetings to discuss matters pertaining to the information security program.

SEC 5.3 General Responsibilities.

(a) Agencies that originate or handle classified information shall:

(1) designate a senior agency official to direct and administer its information security program, which shall include an active oversight and security education program to ensure effective implementation of this Order;

(2) promulgate implementing regulations. Any unclassified regulations that establish agency information security policy shall be published or incorporated by reference in the Federal Register to the extent that

these regulations affect members of the public;

(3) establish procedures to prevent unnecessary access to classified information, including procedures that (i) require that a demonstrable need for access to classified information is established before initiating administrative clearance procedures, and (ii) ensure that the number of persons granted access to classified information is limited to the minimum consistent with operational and security requirements and needs; and

(4) develop special contingency plans for the protection of classified information used in or near hostile or potentially hostile areas.

SEC 5.4 Sanctions.

(a) If the Director of the Information Security Oversight Office finds that a violation of this Order or its implementing directives may have occurred, the Director shall make a report to the head of the agency or to the senior official

**DRAFT**

designated under Section 5.3(a)(1) so that corrective steps, if appropriate, may be taken.

(b) Officers and employees of the United States Government, and its contractors, licensees, and grantees shall be subject to appropriate sanctions if they:

(1) knowingly, willfully, or negligently disclose to unauthorized persons information properly classified under this Order or predecessor orders;

(2) knowingly and willfully classify or continue the classification of information in violation of this Order or any implementing directive; or

(3) knowingly and willfully violate any other provision of this Order or implementing directive.

(c) Sanctions may include reprimand, suspension without pay, removal, termination of classification authority, loss or denial of access to classified information or other sanction in

DRAFT

accordance with applicable law and agency regulation.

(d) Each agency head or the senior official designated under Section 5.3(a)(1) shall ensure that appropriate and prompt corrective action is taken whenever a violation under Section 5.4(b) occurs. Either shall ensure that the Director of the Information Security Oversight Office is promptly notified whenever a violation under Section 5.4(b)(1) or (2) occurs.

## PART 6

### GENERAL PROVISIONS

SEC 6.1 Definitions.

(a) "Agency" has the meaning provided at 5 U.S.C. 552(e).

(b) "Information" means any information or material, regardless of its physical form or characteristics, that is owned by, produced by, produced for, or is under the control of the United States Government.

(c) "National security information" means information that has been determined pursuant to this Order or any predecessor order to require protection against unauthorized disclosure and that is so designated.

(d) "Foreign government information" means:

(1) information provided by a foreign government or governments, an international organization of governments, or any element thereof with the expectation, expressed or implied, that the information, the source of the information, or both, are to be held in confidence; or

(2) any information produced by the United States pursuant to or as a result of a joint arrangement with a foreign government or organization of governments, requiring that the information, the arrangement, or both, be held in confidence.

(e) "National security" means the national defense and/or foreign relations of the United States.

(f) "Confidential source" means any individual or organization that has provided, or that may reasonably be expected to provide, information to the United States on matters pertaining to the national security with the expectation, expressed or implied, that the information or relationship, or both, be held in confidence.

(g) "Original classification" means an initial determination that information requires, in the interest of national security, protection against unauthorized disclosure, together with a classification designation signifying the level of protection required.

SEC 6.2 General.

(a) Nothing in this Order shall supersede any requirement made by or under the Atomic Energy Act of 1954, as amended. "Restricted Data" and "Formerly Restricted Data" shall be handled, protected, classified, downgraded, and declassified in conformity with the provisions of the Atomic Energy Act of 1954, as amended, and regulations issued under that Act.

(b) The Attorney General, upon request by the head of an agency or the Director of the Information Security Oversight Office, shall personally or through authorized representatives of the Department of Justice render an interpretation of this Order with respect to any question arising in the course of its administration.

(c) Executive Order No. 12065 of June 28, 1978; the accompanying presidential Order of June 28, 1978; Information Security Oversight Office Implementing Directive No. 1 of October 2, 1978; and Section 5-209 of Executive Order No. 12148 of July 20, 1979, are revoked as of the effective date of this Order.

(d) This Order shall become effective on \_\_\_\_\_.
