## Hypersonic and High-Temperature Gas Dynamics

## **Second Edition**

John D. Anderson, Jr. National Air and Space Museum Smithsonian Institution Washington, DC and Professor Emeritus, Aerospace Engineering University of Maryland College Park, Maryland

EDUCATION SERIES Joseph A. Schetz Series Editor-in-chief Virginia Polytechnic Institute and State University Blacksburg, Virginia

Published by the American Institute of Aeronautics and Astronautics, Inc. 1801 Alexander Bell Drive, Reston, Virginia 20191-4344

## **Table of Contents**

Preface t	to the Second Edition	xvii
Preface t	to the First Edition	xix
Chapter	1. Some Preliminary Thoughts	1
1.1	Hypersonic Flight—Some Historical Firsts	. 2
1.2	Hypersonic Flow—Why Is It Important?	. 5
1.3	Hypersonic Flow—What Is It?	13
1.4	Fundamental Sources of Aerodynamic Force and	
	Aerodynamic Heating	23
1.5	Hypersonic Flight Paths: Velocity-Altitude Map	27
1.6	Summary and Outlook	29
	Problems	31
	Part 1. Inviscid Hypersonic Flow	
Chapter	2. Hypersonic Shock and Expansion-Wave Relations	35
2.1	Introduction	36
2.2	Basic Hypersonic Shock Relations	36
2.3	Hypersonic Shock Relations in Terms of the Hypersonic	
	Similarity Parameter	42
2.4	Hypersonic Expansion-Wave Relations	44
2.5	Summary and Comments	47
	Problem	49
Chapter	3. Local Surface Inclination Methods	51
3.1	Introduction	52
3.2	Newtonian Flow	54
3.3	Modified Newtonian Law	61
3.4	Centrifugal Force Corrections to Newtonian Theory	63
3.5	Newtonian Theory—What It Really Means	70
3.6	Tangent-Wedge Tangent-Cone Methods	79
3.7	Shock-Expansion Method	83
3.8	Summary and Comments	86

	Design Example 3.1	87
	Problems	100
Chapter	4. Hypersonic Inviscid Flowfields: Approximate Methods .	103
4.1	Introduction	104
4.2	Governing Equations	106
4.3	Mach-Number Independence	107
4.4	Hypersonic Small-Disturbance Equations	111
4.5	Hypersonic Similarity.	118
4.6	Hypersonic Small-Disturbance Theory: Some Results	129
4.7	Comment on Hypersonic Small-Disturbance Theory	145
4.8	Hypersonic Equivalence Principle and	
	Blast-Wave Theory	146
4.9	Thin Shock-Layer Theory	167
4.10	Summary and Comments	173
	Problems	176
Chapter	5. Hypersonic Inviscid Flowfields: Exact Methods	179
Chapter 5.1	5. Hypersonic Inviscid Flowfields: Exact Methods General Thoughts	<b>179</b> 182
<b>Chapter</b> 5.1 5.2	5. Hypersonic Inviscid Flowfields: Exact Methods General Thoughts	<b>179</b> 182 184
<b>Chapter</b> 5.1 5.2 5.3	5. Hypersonic Inviscid Flowfields: Exact Methods General Thoughts	<b>179</b> 182 184
<b>Chapter</b> 5.1 5.2 5.3	5. Hypersonic Inviscid Flowfields: Exact Methods General Thoughts	<b>179</b> 182 184 199
<b>Chapter</b> 5.1 5.2 5.3 5.4	5. Hypersonic Inviscid Flowfields: Exact Methods General Thoughts	<ul> <li>179</li> <li>182</li> <li>184</li> <li>199</li> <li>222</li> </ul>
<b>Chapter</b> 5.1 5.2 5.3 5.4 5.5	5. Hypersonic Inviscid Flowfields: Exact Methods General Thoughts Method of Characteristics Time-Marching Finite Difference Method: Application to the Hypersonic Blunt-Body Problem Correlations for Hypersonic Shock-Wave Shapes Shock–Shock Interactions	<ul> <li>179</li> <li>182</li> <li>184</li> <li>199</li> <li>222</li> <li>225</li> </ul>
<b>Chapter</b> 5.1 5.2 5.3 5.4 5.5 5.6	5. Hypersonic Inviscid Flowfields: Exact Methods General Thoughts Method of Characteristics Time-Marching Finite Difference Method: Application to the Hypersonic Blunt-Body Problem Correlations for Hypersonic Shock-Wave Shapes Shock–Shock Interactions Space-Marching Finite Difference Method:	<ul> <li>179</li> <li>182</li> <li>184</li> <li>199</li> <li>222</li> <li>225</li> </ul>
<b>Chapter</b> 5.1 5.2 5.3 5.4 5.5 5.6	5. Hypersonic Inviscid Flowfields: Exact Methods General Thoughts Method of Characteristics Time-Marching Finite Difference Method: Application to the Hypersonic Blunt-Body Problem Correlations for Hypersonic Shock-Wave Shapes Shock–Shock Interactions Space-Marching Finite Difference Method: Additional Solutions of the Euler Equations	<ul> <li>179</li> <li>182</li> <li>184</li> <li>199</li> <li>222</li> <li>225</li> <li>231</li> </ul>
Chapter 5.1 5.2 5.3 5.4 5.5 5.6 5.7	5. Hypersonic Inviscid Flowfields: Exact Methods General Thoughts Method of Characteristics Time-Marching Finite Difference Method: Application to the Hypersonic Blunt-Body Problem Correlations for Hypersonic Shock-Wave Shapes Shock–Shock Interactions Space-Marching Finite Difference Method: Additional Solutions of the Euler Equations Comments on the State of the Art	<ul> <li>179</li> <li>182</li> <li>184</li> <li>199</li> <li>222</li> <li>225</li> <li>231</li> <li>246</li> </ul>
Chapter 5.1 5.2 5.3 5.4 5.5 5.6 5.7 5.8	5. Hypersonic Inviscid Flowfields: Exact Methods General Thoughts	<ul> <li>179</li> <li>182</li> <li>184</li> <li>199</li> <li>222</li> <li>225</li> <li>231</li> <li>246</li> <li>247</li> </ul>
<b>Chapter</b> 5.1 5.2 5.3 5.4 5.5 5.6 5.7 5.8	5. Hypersonic Inviscid Flowfields: Exact Methods General Thoughts	<ul> <li>179</li> <li>182</li> <li>184</li> <li>199</li> <li>222</li> <li>225</li> <li>231</li> <li>246</li> <li>247</li> <li>247</li> </ul>
<b>Chapter</b> 5.1 5.2 5.3 5.4 5.5 5.6 5.7 5.8	5. Hypersonic Inviscid Flowfields: Exact Methods         General Thoughts         Method of Characteristics         Time-Marching Finite Difference Method: Application         to the Hypersonic Blunt-Body Problem         Correlations for Hypersonic Shock-Wave Shapes         Shock-Shock Interactions         Space-Marching Finite Difference Method:         Additional Solutions of the Euler Equations         Comments on the State of the Art         Summary and Comments         Design Example 5.1         Design Example 5.2: Hypersonic Waveriders—Part 1	<ul> <li>179</li> <li>182</li> <li>184</li> <li>199</li> <li>222</li> <li>225</li> <li>231</li> <li>246</li> <li>247</li> <li>247</li> <li>250</li> </ul>
<b>Chapter</b> 5.1 5.2 5.3 5.4 5.5 5.6 5.7 5.8	5. Hypersonic Inviscid Flowfields: Exact Methods         General Thoughts         Method of Characteristics         Time-Marching Finite Difference Method: Application         to the Hypersonic Blunt-Body Problem         Correlations for Hypersonic Shock-Wave Shapes         Shock-Shock Interactions         Space-Marching Finite Difference Method:         Additional Solutions of the Euler Equations         Comments on the State of the Art         Summary and Comments         Design Example 5.1         Problems	<ul> <li>179</li> <li>182</li> <li>184</li> <li>199</li> <li>222</li> <li>225</li> <li>231</li> <li>246</li> <li>247</li> <li>247</li> <li>250</li> <li>257</li> </ul>

## Part 2. Viscous Hypersonic Flow

Chapter	6. Viscous Flow: Basic Aspects, Boundary Layer	
	Results, and Aerodynamic Heating	261
6.1	Introduction	262
6.2	Governing Equations for Viscous Flow:	
	Navier-Stokes Equations	266
6.3	Similarity Parameters and Boundary Conditions	268
6.4	Boundary-Layer Equations for Hypersonic Flow	272
6.5	Hypersonic Boundary-Layer Theory: Self-Similar	
	Solutions	278
6.6	Nonsimilar Hypersonic Boundary Layers	315
6.7	Hypersonic Transition	327

6.8 6.9 6.10	Hypersonic Turbulent Boundary Layer       Reference Temperature Method         Reference Temperature Method       Hypersonic Aerodynamic Heating: Some Comments         and Approximate Results Applied to	335 341
	Hypersonic Vehicles	346
6.11	Entropy-Layer Effects on Aerodynamic Heating	353
6.12	Summary and Comments	355
	Design Example 6.1	358
	Design Example 6.2: Hypersonic Waveriders—Part 2	361
	Problems	374
Chapter	7. Hypersonic Viscous Interactions	375
7.1	Introduction	376
7.2	Strong and Weak Viscous Interactions: Definition and	
	Description	380
7.3	Role of $\overline{\chi}$ in Hypersonic Viscous Interaction	382
7.4	Other Viscous Interaction Results	389
7.5	Hypersonic Shock-Wave/Boundary-Laver Interactions.	395
7.6	Summary and Comments	407
	Design Example 7.1: Hypersonic Waveriders—Part 3	409
	Problems	413
Chantan	9 Computational Fluid Dynamic Solutions of	
Chapter	o. Computational-Fluid-Dynamic Solutions of	
Cnapter	Hypersonic Viscous Flows	415
8.1	Bypersonic Viscous Flows	<b>415</b> 416
8.1 8.2	With the second seco	<b>415</b> 416 418
8.1 8.2 8.3	<b>B.</b> Computational-Fund-Dynamic Solutions of Hypersonic Viscous Flows         Introduction         Viscous Shock-Layer Technique         Parabolized Navier–Stokes Solutions	<b>415</b> 416 418 424
8.1 8.2 8.3 8.4	a. Computational-Fund-Dynamic Solutions of Hypersonic Viscous Flows         Introduction         Viscous Shock-Layer Technique         Parabolized Navier–Stokes Solutions         Full Navier–Stokes Solutions	<b>415</b> 416 418 424 434

10.4	Classification of Gases	474
10.5	First Law of Thermodynamics	478
10.6	Second Law of Thermodynamics	481
10.7	Calculation of Entropy	483
10.8	Gibbs Free Energy and the Entropy	
	Produced by Chemical Nonequilibrium	485
10.9	Composition of Equilibrium Chemically	
	Reacting Mixtures: The Equilibrium Constant.	488
10.10	Heat of Reaction	495
10.11	Summary and Comments	497
	Problems	499
Chapter	11. Elements of Statistical Thermodynamics	501
11.1	Introduction	502
11.2	Microscopic Description of Gases	503
11.3	Counting the Number of Microstates for a Given	
	Macrostate	512
11.4	Most Probable Macrostate	514
11.5	Limiting Case: Boltzmann Distribution	516
11.6	Evaluation of Thermodynamic Properties in Terms of the	
	Partition Function.	518
11.7	Evaluation of the Partition Function in Terms of $T$ and $V$	524
11.8	Practical Evaluation of Thermodynamic Properties for a	
	Single Chemical Species	528
11.9	Calculation of the Equilibrium Constant	532
11.10	Chemical Equilibrium—Some Further Comments	537
11.11	Calculation of the Equilibrium Composition	
	for High-Temperature Air	538
11.12	Thermodynamic Properties of an Equilibrium	
	Chemically Reacting Gas	542
11.13	Equilibrium Properties of High-Temperature Air	547
11.14	Summary and Comments	557
	Problems	558
Chapter	12. Elements of Kinetic Theory	559
12.1	Introduction	560
12.2	Perfect-Gas Equation of State (Revisited)	560
12.3	Collision Frequency and Mean Free Path	564
12.4	Velocity and Speed Distribution Functions: Mean Velocities	567
12.5	Summary and Comments	571
	Problems	573
Chapter	13. Chemical and Vibrational Nonequilibrium	575
13.1	Introduction	576

13.2	Vibrational Nonequilibrium: The Vibrational	
	Rate Equation	577
13.3	Chemical Nonequilibrium: The Chemical Rate Equation	584
13.4	Chemical Nonequilibrium in High-Temperature Air.	590
13.5	Chemical Nonequilibrium in H <sub>2</sub> -Air Mixtures	595
13.6	Summary and Comments	597
Chapter	14. Inviscid High-Temperature Equilibrium Flows	599
14.1	Introduction	600
14.2	Governing Equations for Inviscid High-Temperature	(01
14.2	Equilibrium Flow.	601
14.3	Equilibrium Normal and Oblique Snock-wave Flows.	604
14.4	Equilibrium Quasi-One-Dimensional Nozzle Flows	617
14.5	Frozen and Equilibrium Flows: The Distinction	623
14.6	Equilibrium and Frozen Specific Heats.	626
14./	Equilibrium Speed of Sound	629
14.8	Equilibrium Conical Flow	033
14.9	Equilibrium Blunt-Body Flows	030
14.10	Summary and Comments	043
	Design Example 14.1: Hypersonic waveriders—Part 4	044
	Problems	646
Chapter	15. Inviscid High-Temperature Nonequilibrium Flows	647
15.1	Introduction	648
15.1 15.2	Introduction	648 649
15.1 15.2 15.3	Introduction	648 649 655
15.1 15.2 15.3 15.4	Introduction	648 649 655 663
15.1 15.2 15.3 15.4 15.5	Introduction	648 649 655 663 671
15.1 15.2 15.3 15.4 15.5 15.6	Introduction	648 649 655 663 671 680
15.1 15.2 15.3 15.4 15.5 15.6 15.7	Introduction	648 649 655 663 671 680
15.1 15.2 15.3 15.4 15.5 15.6 15.7	Introduction	648 649 655 663 671 680 683
15.1 15.2 15.3 15.4 15.5 15.6 15.7 15.8	Introduction	648 649 655 663 671 680 683 687
15.1 15.2 15.3 15.4 15.5 15.6 15.7 15.8	Introduction	648 649 655 663 671 680 683 687 690
15.1 15.2 15.3 15.4 15.5 15.6 15.7 15.8 <b>Chapter</b>	Introduction .       Governing Equations for Inviscid, Nonequilibrium Flows .         Governing Equations for Inviscid, Nonequilibrium Flows .       Nonequilibrium Flows .         Nonequilibrium Quasi-One-Dimensional Nozzle Flows .       Nonequilibrium Blunt-Body Flows .         Nonequilibrium Blunt-Body Flows .       Binary Scaling .         Nonequilibrium Flow over Other Shapes: Nonequilibrium Method of Characteristics .       Summary and Comments .         Summary and Comments .       Problems .         16. Kinetic Theory Revisited: Transport Properties	648 649 655 663 671 680 683 687 690

Chapter	17. Viscous High-Temperature Flows	711
17.1	Introduction	712
17.2	Governing Equations for Chemically	
	Reacting Viscous Flow	712
17.3	Alternate Forms of the Energy Equation	715
17.4	Boundary-Layer Equations for a Chemically Reacting Gas	719
17.5	Boundary Conditions: Catalytic Walls	726
17.6	Boundary-Layer Solutions: Stagnation-Point Heat	
	Transfer for a Dissociating Gas	729
17.7	Boundary-Layer Solutions: Nonsimilar Flows	739
17.8	Viscous-Shock-Layer Solutions to Chemically	
	Reacting Flow	741
17.9	Parabolized Navier-Stokes Solutions to	
	Chemically Reacting Flows	749
17.10	Full Navier-Stokes Solutions to Chemically	
	Reacting Flows	751
17.11	Summary and Comments	756
	Problems	756
Chapter	18. Introduction to Radiative Gas Dynamics	759
18.1	Introduction	760
18.2	Definitions of Radiative Transfer in Gases	760
18.3	Radiative-Transfer Equation	763
18.4	Solutions of the Radiative-Transfer Equation:	
	Transparent Gas	765
18.5	Solutions of the Radiative-Transfer Equation:	
	Absorbing Gas	768
18.6	Solutions of the Radiative-Transfer Equation:	
	Emitting and Absorbing Gas	769
18.7	Radiating Flowfields: Sample Results	773
18.8	Surface Radiative Cooling	780
18.9	Summary and Comments	781
	Design Example 18.1	782
	Problems	785
