

STATE OF LOUISIANA
SIXTEENTH JUDICIAL DISTRICT COURT
PARISH OF ST. MARY

STATE OF LOUISIANA

v.

CAROLINE NICOLE HARRIS

CASE NO. 2025-215897

**EMERGENCY MOTION TO VACATE COMPETENCY EVALUATION
ORDER AND APPOINT QUALIFIED EXPERT**

NOW INTO COURT comes Reverend David Edward Lucito, Next Friend of Defendant Caroline Nicole Harris, pursuant to standing asserted in the Verified Affidavit filed February 5, 2026, who respectfully moves this Court to vacate its competency evaluation order dated January 20, 2026, and to appoint qualified experts with demonstrated expertise in behavior influence systems, directed energy weapons, and compelled conduct.**

SPECIFICALLY, Next Friend moves that this Court: (1) **vacate its January 20, 2026 order appointing Luke Verret and Sarah DeLand**; (2) **stay any sanity commission proceedings** pending appointment of qualified experts; and (3) **appoint Dr. Michael Hoffer** (University of Miami) and/or **Dr. Lydia Shajenko** (New Jersey), or other experts with equivalent expertise in distinguishing compelled behavior from mental illness.

****Standard forensic evaluators will catastrophically misdiagnose Ms. Harris because they lack training in:****

- Behavior influence systems and compelled conduct
- The controlled deploy creating readable patterns across multiple actors
- The distinction between accurate reporting of technological assault and psychosis

I. THE PROBLEM: STANDARD EVALUATORS CANNOT DISTINGUISH COMPULSION FROM DELUSION

A. Ms. Harris Will Report Compelled Behavior - Evaluators Will Call It Psychosis

What Ms. Harris will say (based on February 2026 letters):

"I made a mistake after being electrocuted in my parent's house. NSA told me don't talk to local police. A border agent said I have heavy lithium in my blood. I contacted Tulsi Gabbard, Elon Musk, FBI, and NSA for help."

What standard evaluators will diagnose:

- "Electrocuted" = paranoid delusion
- NSA contact = ideas of reference / thought broadcasting
- "Heavy lithium" = lack of insight into mental illness
- Contacting public figures = grandiosity / persecution complex
- **CONCLUSION: Incompetent to stand trial due to psychotic disorder**

But Ms. Harris is accurately reporting:

- **Compelled behavior** under technological control ("electrocuted" describes DEW bioeffects)
- **Actual NSA contact** (NSA personnel potentially compelled to make bizarre statements)
- **Actual border agent statement** (agent potentially compelled by forced programming code)
- **Rational outreach** to appropriate authorities for DEW targeting cases

EVERY "SYMPTOM" is actually ACCURATE REPORTING of the controlled deploy this Court is witnessing.

B. This Is A Controlled Deploy - Not A Mental Illness

Ms. Harris is part of a documented pattern of compelled behavior across MULTIPLE actors:

****COMPELLED TARGETS:****

- Caroline Harris: Compelled to slash tires (if she did) and make bizarre reports
- Next Friend: Previously misdiagnosed in May 2023 for accurately reporting LSP/military harassment (later verified by IA-2300029, DCIS subpoena, SGT Green recordings)

****COMPELLED OFFICIALS:****

- NSA personnel: Compelled to tell Ms. Harris "don't talk to local PD"
- Border Patrol agent: Compelled to tell Ms. Harris "heavy lithium in blood"
- Navy sailors: Compelled to tell Ms. Harris specific "implant counts"
- LSP Trooper Holiday: Compelled involvement in neuroweapon deception (IA-2300029 sustained finding)
- Alabama Guard SGT Green: Compelled harassment, admits being "robotted" on recorded calls

THIS IS SYSTEMATIC COMPULSION using forced programming code with bizarre neuroweapon themes meant to be READABLE to this Court.

C. Standard Evaluators Lack The Expertise To Recognize This

Dr. Sarah DeLand and Luke Verret are competent forensic evaluators for **traditional mental illness cases**. But they lack training in:

1. **Behavior influence systems** creating compelled conduct
2. **Controlled deploys** with forced programming code
3. **Multi-actor compulsion** (targets AND officials)
4. **Readable patterns** designed for escalation
5. **DEW bioeffects** vs. psychiatric symptoms
6. **Federal/military targeting** programs (Havana Syndrome, etc.)

Without this expertise, they WILL misdiagnose compelled behavior as psychosis.

II. RECENT PRECEDENT: DR. DELAND'S EVALUATIONS ARE INSUFFICIENT

In **State v. Daniel Callihan** (E.D. La. 2025), Judge Lance Africk of the United States District Court **refused to accept a competency finding from Dr. Sarah DeLand** and ordered a different evaluator because he was "**concerned about the thoroughness of the mental examination.**"

****If Dr. DeLand's standard assessments are insufficient for routine cases, they are CERTAINLY insufficient for cases involving:****

- Behavior influence systems

- Compelled conduct across multiple actors
- Controlled deploys with readable patterns
- Federal/military targeting operations

III. THE CONTROLLED DEPLOY MUST BE UNDERSTOOD TO EVALUATE MS. HARRIS

A. Everyone Is Being Compelled - Not Just Ms. Harris

PATTERN OF COMPULSION:

1. **Caroline Harris:** "Made a mistake after being electrocuted" (compelled conduct + awareness)
2. **NSA personnel:** Tell her "don't talk to local PD" (compelled statement creating bizarre code)
3. **Border Patrol agent:** Tell her "heavy lithium" (compelled forced speech NOT about actual lithium)
4. **Navy sailors:** Tell her specific implant counts (compelled forced speech)
5. **LSP Trooper Holiday:** Conducts psychological operation with fake "neuro-wave device" (IA-2300029 proves compulsion)
6. **Alabama Guard SGT Green:** Admits being "robotted" to harass Next Friend (explicitly states compulsion)

This is not coincidence. This is SYSTEMATIC BEHAVIOR INFLUENCE creating readable patterns.

B. The Bizarre Statements Are Forced Programming Code

These statements serve multiple purposes:

****NSA "don't talk to local PD":****

- Discourage lawful police contact
- Create targetable bizarre "keyed code"
- Add to readable pattern of official compulsion

****Border Patrol "heavy lithium":****

- Reference covert dosing for signals propagation
- Imply psychiatric control ("she should be on lithium")
- **Forced speech using keyed code: "referencing forced lithium for bizarre behavior induced by the weapon BY the bizarre statement"**

****Navy "implant counts":****

- Create paranoia about physical implants
- Add to the bizarre neuroweapon theme
- Force speculation and distraction

ALL are part of the controlled deploy meant to be READABLE as systematic compulsion.

C. Standard Evaluators Will Miss This Entirely

Standard forensic psychiatry training teaches:

"If patient reports being controlled by technology → diagnose psychotic disorder"

"If patient reports government surveillance → diagnose paranoid delusion"

"If patient reports electronic harassment → diagnose schizophrenia"

But here:

■ Ms. Harris IS being controlled by technology (documented DEW systems) ■ Government agencies ARE involved (NSA, Border Patrol, Navy, LSP, Alabama Guard) ■ Electronic harassment IS occurring (pattern across multiple actors proves it)

Standard evaluators will mechanically apply psychiatric criteria and miss the ENTIRE REALITY of the controlled deploy.

IV. QUALIFIED EXPERTS ARE AVAILABLE

A. Dr. Michael Hoffer (University of Miami)

- Otolaryngology and neurological surgery professor
- Examined Havana Syndrome victims in Cuba

- Published peer-reviewed research on DEW neurological effects
- Testified before National Academies
- Understands federal awareness of targeting operations
- Can distinguish technological assault from psychiatric disorder

B. Dr. Lydia Shajenko (New Jersey)

- Neurologist and clinical neurophysiologist (MD/PhD)
- Specializes in DEW-induced neurological conditions
- Uses comprehensive testing to detect neuroweapon trauma
- Treats individuals with electromagnetic weapon exposure
- Understands behavior influence systems and compelled conduct

C. These Experts Can Recognize The Pattern

Qualified experts will:

1. **Investigate the multi-actor compulsion pattern** (not just evaluate Ms. Harris in isolation)
2. **Examine external evidence** (LSP IA-2300029, SGT Green recordings, PACTS validation)
3. **Distinguish compelled behavior from psychosis** (awareness + external control ≠ delusion)
4. **Understand federal involvement** (NSA, Border Patrol, Navy statements)
5. **Recognize the controlled deploy** (readable patterns, forced code, systematic escalation)

They will conclude: Ms. Harris is COMPETENT but under COMPULSION - requiring dismissal of charges, not psychiatric commitment.

V. PRAYER FOR RELIEF

WHEREFORE, Next Friend respectfully prays that this Honorable Court:

1. **VACATE** the competency evaluation order dated January 20, 2026;

2. **VACATE** any competency evaluation report already completed by Luke Verret and/or Sarah DeLand on grounds that evaluators lack expertise in behavior influence systems and compelled conduct;

3. **ORDER** that any competency evaluation of Ms. Harris be conducted **only by experts qualified in:**

- Directed energy weapon effects and Havana Syndrome
- Behavior influence systems and compelled conduct
- Distinguishing technological assault from psychiatric disorder
- Federal/military targeting operations
- Multi-actor compulsion patterns

Specifically: **Dr. Michael Hoffer** (University of Miami) and/or **Dr. Lydia Shajenko** (New Jersey);

4. **ORDER** that evaluators must:

- Investigate the multi-actor compulsion pattern (not just evaluate Ms. Harris in isolation)
- Review LSP IA-2300029, SGT Green recordings, PACTS validation
- Consider federal involvement (NSA, Border Patrol, Navy)
- Recognize this is a controlled deploy with readable patterns;

5. **FIND** that standard forensic evaluators lack necessary expertise to distinguish compelled behavior from mental illness in cases involving behavior influence systems;

6. **FIND** that recent federal precedent (*State v. Callihan*) establishes Dr. DeLand's evaluations can be insufficient when specialized assessment is required;

7. **ACKNOWLEDGE** that this case involves documented compulsion of multiple actors (civilian and official) requiring specialized expertise standard evaluators do not possess;

8. **RULE ON THIS MOTION WITHIN 72 HOURS** given:

- Evaluation likely already occurred with unqualified evaluators
- Early March 2026 hearing imminent
- Irreparable harm from false incompetency finding based on misdiagnosis;

9. **GRANT** any and all other relief this Court deems just and proper.

Respectfully submitted,

REVEREND DAVID EDWARD LUCITO

Next Friend of Defendant Caroline Nicole Harris
