

Started in the year 2020 with the following

- Showed strange dreams and being hypnotized frequently and made me believe that my neighbors were doing it .
- Loud ringing noise in my ears and my scalp was being poked with great pressure
- Constantly provoked by v2k voices

Over the past 1.5 years the torture has increased tremendously and I am experiencing all of the following

- Every minute of that day there is a force trying to harm me and there is a voice which goes on saying hit yourself on your eyes and along with this voice there is a force put on my arms, and a lot of energy is spent on this and I am not allowed to concentrate on the work that I am doing because of this.
- Poked near the private parts ,head other areas of the body throughout the day by some signals not sure if they are emf signals.
- Vulgar jokes/thoughts/dreams being implanted in my mind.
- Sensation of burning near the private parts.
- They hypnotize the mind and continuously say hit yourself.
- Obnoxious odors are being forcefully put in the nose .
- Whenever I think of something there is a voice which says something about it or. gives an opinion about it.
- Disturbed sleep and forced dreams.
- Not allowed to work by the continuous talking of the perpetrators , they look to be using some kind of Artificial Intelligence to do this.
- Continuously shown dreams/illusions that I have already hit myself and this unnecessarily creates fear and I have to go the hospital to check my eyes (wasted a lot of money because of this).
- Fearful thoughts are being implanted ,and whenever I talk to someone there is a voice which says hits yourself and disturbs me in the conversation.

- Trying to push my arms to touch others inappropriately.
- Trying to push my arms to hit my ears.
- Unable to hold onto a job for long time because of the sheer negativity , torment and hopelessness.
- Whenever i see any sharp object they say hit yourself in the eyes with it and also confuse my mind and push my arms toward the sharp object , its been days since i wore an earring and ate with a fork and spoon because of this.
- Provoke me to scratch myself resulting in peeling off my skin on my arms and chest .
- Provoking me to hit myself .
- Provoking me to pull my hair .
- I am not allowed to apply even medicated creams in case of an infection , they force me by putting immense pressure on my arms to make me swallow the cream applied on the infected area, and because of this I dont apply the cream itself.
- Workplace conflicts due to v2k and d2k
