#OpAPT28 - Operation APT28 - Fancy Bear by Anonymous, Part2.

-

Greetings to APT28 and the GRU. This is Anonymous. You started a cyberwar, we just ended it. All your informations are now exposed to the public.

APT28, also referred to as Fancy Bear, Sofacy, Sednit, Pawn Storm, Strontium, or Forest Blizzard, is a cyber espionage group linked to the Russian GRU (military intelligence), particularly Units 26165 and 74455. Active since at least 2004, APT28 is known for conducting advanced cyberattacks aimed at

government, military, diplomatic, and strategic targets for espionage and destabilization purposes. In July 2018, the U.S. Department of Justice charged 12 GRU officers for their involvement in interfering with the 2016 U.S. presidential election, which included hacking the Democratic National Committee (DNC) and the Clinton campaign. This document provides detailed information on the individuals indicted, the charges against them, and other pertinent data from credible sources.

Yesterday we identified their C2 domain, along with its subdomains, and the full list of members can be seen here : <https://justpaste.it/k3tr1>

Today we are publishing a last or penultimate post about the personal information of APT28 members and the various military units (74455, 74445, 26165, 29155).

All this information has been verified and comes from reliable sources.
