

Business Proposal for Investment in the MAC 5000 Searle Generator

I. Executive Summary

Joshua Havens and Jonathan Clements, as co-founders of Jedi Security, seek investment from Sarah Hospodar to advance the MAC 5000 Searle Generator, a revolutionary energy technology designed for energy independence, security, and sustainability.

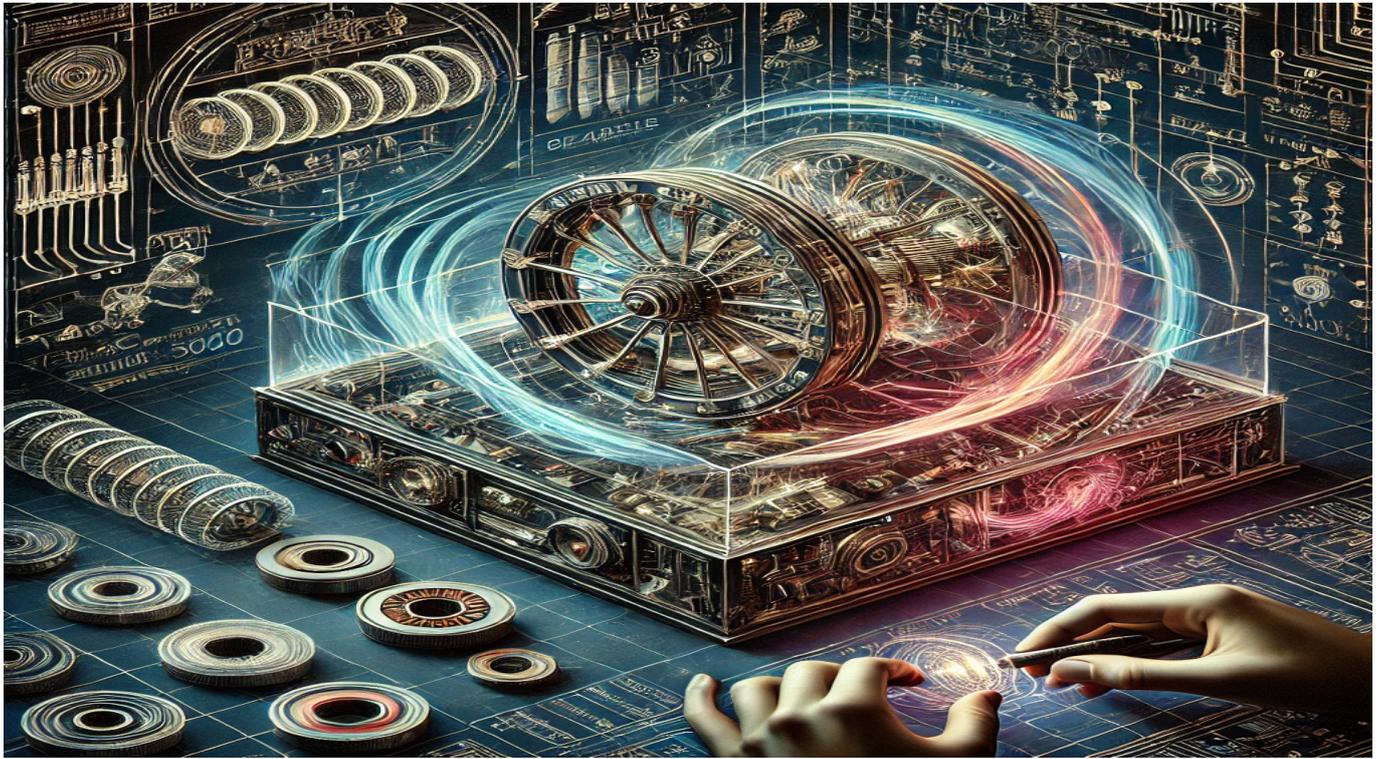

II. The Problem: The Need for Secure, Independent Energy

Current global energy markets are centralized and vulnerable to cyber threats. The MAC 5000 offers a decentralized, secure, and self-sustaining energy alternative.

IV. Market Opportunity

The global backup power market is projected to grow to \$48.7 Billion by 2032. The MAC 5000 is positioned to meet growing demands for secure energy solutions.

V. Investment Structure & ROI

Investment Request: \$5,000,000 for prototype completion, manufacturing, and market entry. Expected ROI: Break-even in 24-36 months, potential \$150M+ revenue by year 5.
