

Starlink, QFS (Quantum Financial System) & Stellar!

Explaining the NEW Earths' Ultra-Secure Financial System for Every Country and Every Person on the Planet!

By Mark Baughman 5/21/2022

Starlink Internet Objectives and Costs!

- According to Starlink, its primary mission and the first order of business is to bring high-speed internet to people who don't currently have access to it, meaning primarily homes in rural areas.
- Starlink is a satellite internet company owned by Elon Musk, the founder of aerospace company SpaceX.

- The beta price for the internet service is an upfront cost of \$499 for hardware and a monthly cost of \$99 for internet service.
- Starlink is Elon Musk's Satellite Internet for even the most remote locations—Up to 200MBS.
- Users can expect to see download speeds between 100 Mb/s and 200 Mb/s and latency as low as 20ms in most locations. (Latency is the time it takes data to get from Point A to Point B.)
- Ideal for Remote Locations: Starlink is ideally suited for areas where connectivity has been unreliable or completely unavailable. People across the globe are using Starlink to gain access to education, health services and even communications support during natural disasters.

Starlink's Low Orbit, High Speeds and Coverage Worldwide Internet Service!!

- Starlink is a constellation of multiple (over 1700 now) satellites that orbit the planet much closer to Earth, at about 550km, and cover the entire globe. They expect over 3,000 satellites when finished.
- Because Starlink satellites are in a low orbit, the round-trip data time between the user and the satellite – also known as latency – is much lower than with satellites in geostationary orbit. This enables Starlink to deliver services like online gaming that are usually not possible on other satellite broadband systems.

Starlink Kit at your Home!

Military is Using Starlink for Defense!!

- We do know that Starlink is Being used for SDI (Strategic Defense Initiative), like back in the Reagan years, as STAR WARS. To destroy incoming Nuclear Missiles from our enemies. This will be all countries worldwide, providing Peace for all people, all countries on the Planet.
- Starlink can do this, and much more. Using DEW (Direct Energy Weapons (Lazer Weapon)).
- Destroys all missiles, Nuclear or Conventional Weapons, if they choose.
- Even those launched and stays 10 feet off the ground.
- This will be used for QVS (Quantum Voting Systems) too. In this QVS, no one can cheat again.
- The Starlink system will be used to “Keep the Peace Worldwide”
- The Starlink System will “keep all citizens on the planet, in all countries sovereign and free”. No Government will be able to do criminal acts against any of their citizens.

The New Worldwide QFS (Quantum Financial System) is a Part of Starlink. When NESARA/GESARA is implemented

- NESARA (USA) / GESARA (Global)
National Economic Security and Reformation Act.
Global Economic Security and Reformation Act.
- GESARA will be rolled out slowly. All Debt will be forgiven. There will be a monthly stipend given to everyone on the planet. There will be only a flat-tax on new item only.
- Forgives all credit card, mortgage, student loan and other bank debt due to illegal banking and government activities
- . Dissolves the IRS and ends all income tax
- . Creates flat rate non-essential “new items only” sales tax (food, medicine and all used items will not be taxed)
- . Increases benefits to senior citizens
- . Returns Constitutional Law to all our courts and legal matters – re-trains all judges and attorneys in

Constitutional Law

- . Provides for new representational elections within Constitutional Law.
- . Monitors elections and prevents illegal activities of billionaires and special interest groups.
- .
- Ends the Federal Reserve System and begins a new US Treasury bank system that follows Constitutional Law
- Creates new US Treasury currency backed by gold, silver and precious metals, ending US Government bankruptcy. This will initiate global economic reform.
- . Restores financial privacy
- . Ceases all aggressive US Government military action worldwide
- . Leads to peace throughout the world
- . Enables release of over 6,000 patents of suppressed technologies and enormous sums of money for humanitarian purposes,

- This is the Great Financial Shift, leading into a new Quantum Financial System, which can only hold true asset-backed currency. Asset backed digital currency qualifies as a “currency”.
- All Currencies will be “Asset Backed” in every country. This can be Gold, Silver, Platinum, Oil, precious metals or any other major assets the country has.
- Only two Crypto Currencies will be Gold Backed XRP & XLM!
- All others that is NOT asset backed, will be gone by end of 2022.
- The Quantum Software and Computers, makes the system the most secure on the planet, and it cannot be hacked.
- All banking transactions, in time, will be on the QFS.
- Banks, as we know it will change, dramatically.
- The QFS will carry all money in “Digital Form”, though still asset backed.
- All money transfers (movement) will have at least 50 move recording that will be stored in Milli-Seconds on Six major Server Farms on the surface, at the same time.
- All money movement has the permanent record stored. That way there is NO cheating or criminal acts, that cannot be traced.
- All people will have an “digital wallet” account on the QFS, not a bank.
- This Digital Wallet is 100% secure.
- One can use a “Debit Card” directly from this account.
- One can transfer money with 100% security to any bank account, country, citizen anywhere in the world.
- We will receive “Q” Phones (Quantum Phones) & “Q” Computers to be 100% secure worldwide.

Stellar –No-One Owns Stellar—It is a Military Operation Worldwide of the Alliance (Stellar Software on Starlink)

- How does Stellar work?
- At the lowest level, Stellar is a system for tracking ownership.
- Stellar is a system without a central authority—meaning no one can stop the network or secretly adjust the numbers to his liking—yet even without a central authority the ledgers are verified and updated, every five seconds.
- A unique algorithm, called the Stellar Consensus Protocol (SCP), keeps everything in sync. There are many ways to get agreement across a decentralized system—Bitcoin's visionary proof-of-work method was the first and is still the most famous. But, like many first drafts, proof-of-work left room for improvement. SCP strives to be better by being configurable, fast, and highly energy efficient.
- Stellar is a company, that we will keep our humanitarian money.
- Stellar will be a base for the QFS.
- Stellar is a military operation.
- Stellar is a de-centralized platform, for money security reasons.
- Stellar is also, contracted by the new U.S. Treasury to make or mint the “Crypto-Coins for All Assets in all countries worldwide”.
- Stellar is an open-source network for currencies and payments. Stellar makes it possible to create, send and trade digital representations of all forms of money: dollars, pesos, bitcoin, pretty much anything. It's

designed so all the world's financial systems can work together on a single network.

- Stellar has no owner; if anything, it's owned by the public. The software runs across a decentralized, open network and handles millions of transactions each day. Like Bitcoin and Ethereum, Stellar relies on blockchain to keep the network in sync, but for the end-user experience is more like cash.
- Stellar is much faster, cheaper, and more energy-efficient than typical blockchain-based systems.

Stellar and Protocols That Have to Be In-Place, Before Implemented

✦✦Stellar✧ (and Stellar Protocol rollout) is connected to military ops, both tactical strikes and strategic restoration/healing! □

- Clearing/removing blockages and negative entities is not just an energetic thing we must learn and practice for ascension☯, but the military is literally and physically doing the same with the cabal☀
- ✓Protocol 17 asset clawback <> Trump EOs 13818, 13848, 1395 (To freeze Criminal Assets)
- ✓Protocol 18 automated market makers & liquidity <> liquidity pools, market making, testing anchors (on/off ramps) and interoperability (fchain XRP started this)
- ☞□this ensures that when Protocols 19&20 kick in, the value can flow between assets and networks without the blockages
- ☀Protocol 19 ISO20022 regulation, flushing in Khazarian 💵volume💵 to Stellar ecosystem to enhance liquidity (coming this summer 2022)

- 🌟 Protocol 20 completing the global quantum matrix (coming year end, 2022)
- Now do you see how The Event, Odin, QFS, unleashing the leylines couldn't happen until Stellar is in place?
Q&A It's because when the military is ready to pull the trigger, Stellar will be the main platform for RV and GESARA.

XRP & Everyone in the World will have a Digital Wallet!

- XRP will be the “Asset Backed” crypto currency that will be part of the transfer of money. One can pick up the New USN notes at the other end, or it can be an international transfer, and one can pick-up that in-country currency.
- XLM will be another crypto that will be asset backed. By the end of the year, all crypto that will be available will have to be asset backed.
- This “incorruptibility” of XRP and the tracking of the movement of money, is the death of the Cabal.
- Seizure and confiscation of all assets for any entity found to be involved in or supporting the trafficking of drugs, of sex, of influence, of treasonous actions that harm the people will be facilitated under Executive Order 13818.
- There will be no escape.
- The wise White Hats have also made it possible to alert the “Authorities” on every (pending) illicit act.
- This very incorruptibility of XRP will bring down every sitting government in the world involved in corrupt acts, influenced by treasonous individuals to harm the population.

XRP & Ripple!!

- Ripple is a money transfer network designed to serve the needs of the financial services industry.
 - XRP is the native cryptocurrency on the Ripple network, and it consistently lists among the top 10 cryptocurrencies by market capitalization.
- XRP is part of Stellar Software and Starlink!
- Ripple is the company behind XRP, and it's a payment settlement system and currency exchange network that can process transactions globally.
- “Ripple was designed from the very beginning to essentially be a replacement for SWIFT (a leading money transfer network) or to otherwise replace the settlement layer between major financial institutions,” says Pat White, CEO of Bitwave.
