Customized Quality,  
Innovation

OTS FACILITIES

CRAWFORDVILLE, FL

## St. Marks Powder Products

### OPTIONS

- » Flash Suppression
- » De-coppering Agents
- » Density
- » Energy Level

### STANDARD ATTRIBUTES

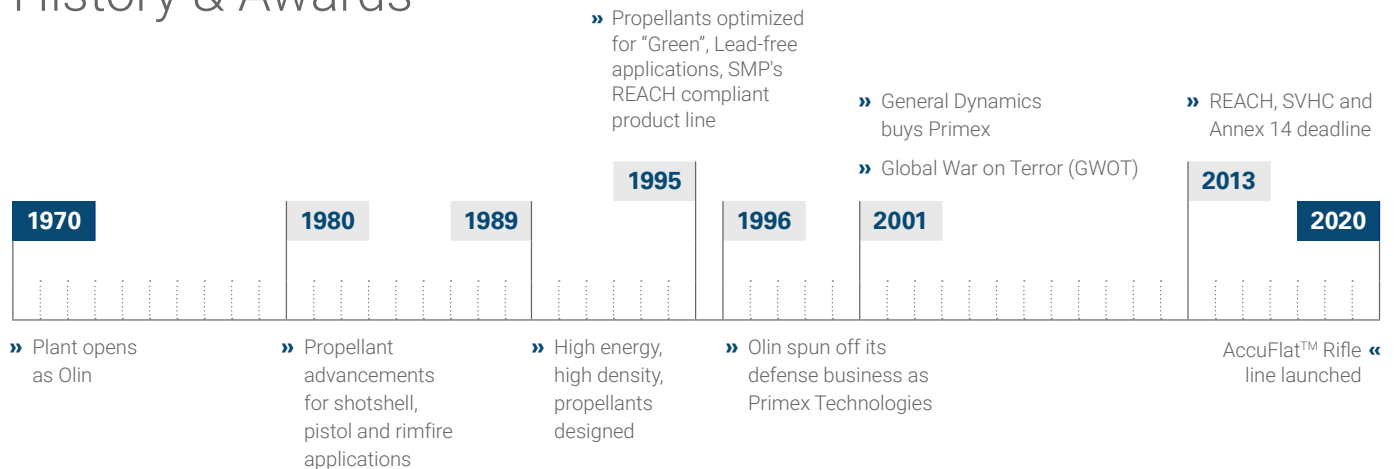

- » High degree of lot-to-lot consistency
- » Extends barrel life
- » Consistent volumetric charging
- » Can be tested and certified with your components
- » Pack-to-Pack consistency (tested at St. Marks Powder)

We manufacture to your specific requirements using your components. When you receive your BALL POWDER® Propellant order, you are assured it will meet your specifications and expectations.

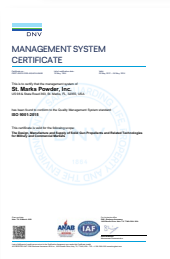

Our capabilities and rapid success in propellant development is a result of our team of Engineers, Scientists and Technicians at the St. Marks Powder Pilot Plant facility. Our R&D facility stands alone from our production facility, with hardware which can be rapidly employed for a myriad of applications and new concepts. We pride ourselves on thinking “outside of the box”, and developing novel approaches within the fundamentals of internal ballistics.

## History & Awards

### THE AMBROSE AWARD

The Ambrose Award is presented periodically to recognize an Industrial Firm which, in the opinion of the Small Arms Division Executive Board, has made outstanding contributions in the field of small arms systems. An outstanding contribution is characterized by exemplary commitment and contribution to the Armed Forces by delivering superior material that meets required operational capabilities and supports a high level of force readiness in the conduct of war fighting activities or homeland defense.

## OTS FACILITIES

St. Marks Powder

## DIFFERENTIATORS

A team of engineers, scientists and technicians who constantly innovate our propellants to meet emerging needs, optimized for applications.

## HIGH QUALITY AND CONSISTENCY

Lot-to-lot and sub-lot consistency reduces ammunition scrap and down-time, driving usage costs down.

## ST. MARKS POWDER SOLVES PROBLEMS FOR OUR CUSTOMERS

Through years of industry knowledge and mastery of internal ballistics, we assist our customers in the diagnosis of ammunition and weapon systems.

**St. Marks Powder has been in the export business since 1970.** We have the necessary infrastructure in place to obtain export and import licenses, interface with freight forwarders and comply with international regulations such as CE markings and REACH.
