Organizational Notes: Founded: 1987. **Former Names:** Office of Merit Systems Review and Studies. **Staff:** 12 analysts, 4 publication personnel.

Research Activities and Fields: Office conducts special studies of U.S. Civil Service and other federal merit systems; focusing on human resource management issues. Also conducts oversight studies of the Office of Personnel Management.

Resources: Federal survey databases dating back to 1983 maintained at the National Archives and are available to the general public.

Publications and Services: Publishes special study agendas, reports, and pamphlets.

National Academy of Engineering

National Academy of Engineering (NAE)

1200 Constitution Ave., NW Phone: (202)334-3200
Washington, DC 20418
M. White, President

Organizational Notes: Founded: 1964. Academy is managed by a board of six elected officers and 12 other members. It was established under the charter of the National Academy of Sciences.

Staff: 1500 members are elected on the basis of outstanding contribution to engineering theory or practice (including contribution of engineering) or unusual accomplishment in the field of new and developing fields of technology.

Activities and Fields: The National Academy of Engineering works with the National Academy of Sciences the responsibility of advising the federal government. Also sponsors engi-

neering programs aimed at meeting national needs, encourages education and research, and recognizes the superior achievements of engineers.

Publications and Services: Annual meetings of the National Academy of Engineering are held in October.

National Research Council (NRC)

2138

2101 Constitution Ave., NW Phone: (202)334-2100
Washington, DC 20418 Fax: (202)334-1597
Bruce Alberts, Chairman

Organizational Notes: Founded: 1916. NRC is governed by a 13-member board made up of members of the National Academy of Sciences, the National Academy of Engineering, and the Institute of Medicine. The Governing Board approves each project and annually reviews the programs and budget of each of the Council's eleven divisions. After project approval, committees are assembled to conduct the work and project results are reviewed by an independent group to validate the findings. **Staff:** Approximately 650 professional staff; 9000 scientists, engineers, and other professionals volunteer for service on NRC committees.

Research Activities and Fields: Council is the working arm of the National Academy of Sciences and the National Academy of Engineering, carrying out most of the studies done in the Academies' names. The majority of the Council's work is done in response to specific questions from federal agencies or Congress. Occasionally some research is conducted in conjunction with philanthropic foundations, and NRC does initiate studies which it considers to be of national importance (these are funded through unrestricted grants from industry and private foundations and income from the Academies' endowments). Activities are carried out in twelve divisions: Commission on Behavioral and Social Sciences and Education; Commission on Engineering and Technical Systems; Commission on Geosciences, Environment, and Resources; Commission on Life Sciences; Commission on Physical Sciences, Mathematics, and Applications; Office of International Affairs; Office of Scientific and Engineering Personnel; Board on Agriculture; Mathematical Sciences Education Board; Board on Science, Technology and Economic Policy; Strategic Highway Research Program; and Transportation Research Board. Advice from the NRC may take many forms: early warnings of potential concerns, proposals to solve problems and set priorities, guidance in planning and policy formation, evaluation of programs, assessment of risks and benefits, and encouragement of the health and progress of the scientific disciplines.

Publications and Services: Most committee projects result in formal reports. All NRC reports, except a limited number on defense topics that are classified, are made public. New studies and publications are announced monthly in News Report, which is available upon request from the Office of Public Affairs. Information on reports and other publications may be obtained from the National Academy Press.

Robert M. White, President

Organizational Notes: *Founded:* 1964. Academy is managed by a council of six elected officers and 12 other members. It was established under the charter of the National Academy of Sciences, as a parallel organization of outstanding engineers. It is autonomous in its administration and in the selection of its members. *Staff:* 1500 members are elected on the basis of outstanding contribution to engineering theory or practice (including the literature of engineering) or unusual accomplishment in the pioneering of new and developing fields of technology.

Research Activities and Fields: The National Academy of Engineering shares with the National Academy of Sciences the responsibility for advising the federal government. Also sponsors engi-

neering programs aimed at meeting national needs, encourages education and research, and recognizes the superior achievements of engineers.

Publications and Services: Annual meetings of the National Academy of Engineering are held in October.
