## DRAFT

Chief, Security Research Staff

FROM : Chief. Technical Branch

SUBJECT : Information, Request for from 97871SS

REFERENCE: TB Letter to 27 July 195h

Subject:

- 1. Referenced letter requested full reports on certain botanicals which year were to be studied and examined by \$\mathcal{G}S\$/ISS\$ and upon which this office had received no information of value since date of delivery in Narch-April 1953. This letter also pointed out urgency of such information in view of commitments with the in highly classified project now developing.
- 2. In view of above mentioned project with which you are totally familiar, it is also urgantly requested that an official 30 memorandum be addressed to 275 requisitient requesting all available information and the items which are set out below. This request, of course, is fully in line with the marticipation and membership in the ARTICHOKE conference.
- 3. In this chunection, it is believed ARTIGHORD representation can be informed (if they have not been already so informed) that a highly sensitive project will soon be set in motion which will require the latest and most advanced scientific information and which will involve ultimate type experiments on human beings never proviously attempted.

## # F

4. For these reasons this office would like to obtain from OFSTER all data (including toxicity reports, techniques of administration, experimental studies and results, etc.) of the following substances and any additional

substances previously studied or now being studied by Govalong psychochemical lines and not mentioned herein:

A. LSD-25

B. Mescaline

C. Cannabis

D. Chlorpromazine

SKF " "

E. Cocaine

F. Desoxyn

G. Bolitrone

H. Harmaline, Harmine
