

KEN SESSION: #159 (MAP # etc. 13HL)

0800 4 April 1980.

> ^{200 ft. +} Very tall scaffolding, at base is peculiar... thing... like an X shape on the ground... or V shape... Supported on pilings,

underground in places (object) and elevated in other places. goes on a small cut away cement ditch a lined shallow ~~source~~ ^{source}. On Pilings: feeling down in a cement type work — domed rivine. (don't see water). to left is high town and scaffolding that's elongated.

(MOVE OVER TARGET) (Describe terrain)

> feeling of, on distant horizon, humps — Sunrise. Looking at Sun rise — more terrain features to back side — right side low hill (Snow-capped.)

At back — 30 miles back — a mountain... essentially.

away from town — official structure — about 4 stories.

Surrounding area has people and structures — but (no big city) more like an outpost or a — like a little town — small city — stretches away in a recent shape on right which would be in the mountain on right.

(FOCUS ON ACTIVITY)

> Attracted to and impressed by rugged jagged concrete blocks elevated off ends of scaffolding. Very square & stark. — supports vehicles — which can drive up on blocks on this very deep cut or gorge. As re supporting scaffolding & suspended in folding. Some angles — cement round bases

earlier wanted to say the cut is a large rounded conduit — mouth or hole — flush with the wall.

MOVE AHEAD IN TIME 20 APRIL 1980 0800hrs.
REPORT ACTIVITY.

Getting a feeling that the thing is ~~over~~ over...
that it is done... blankness to scaffolding &
emptiness — what was there is now gone.

LOTS OF NOISE.

Large exposure of cement is now exposed.

No activity, feeling of vacantness... party
is over... quiet. Nothing in there...
Very Quiet.

* Trucks going & coming on ramps.

elaborate type of open cage ~~in~~ up moving up.
Very high up feeling!

two ~~more~~ in ~~open~~ open ~~about~~ about . inside
range.
