

I HAD A DREAM

I had a dream last night that this nation awoke from its collective insanity and voted for real change. I woke up this morning and had to pinch myself to believe it wasn't a dream at all... It was a miracle! What a gift the State of Massachusetts have given this nation... first the Boston Tea Party... and now this... the most compelling "wake up call" in the history of modern American politics.

They have voted for a candidate that not only said "no" to Health Care reform as designed by the Democrats in secret... with their inside deals and payoffs to special interests... and by mortgaging our children's future... He not only said "NO... But Hell no!... I'll be the 41st vote against it"!

As a former military man... it made my heart sing to hear a politician say... "Buy more weapons to kill the enemy... quit paying for their lawyers and give them civil rights afforded to American citizens... For God's sake... we are at war with these people... they're not common criminals"!

Finally some politician recognizes that these people want to destroy us... quit coddling them... Maybe we need to take a lesson from the first Americans... Like the North American Plains Indians who used to have a saying... *"Dead enemy... quickest way to peace"*. It's about time we reject the stupidity of Political Correctness and realize it's time to get tough. Quit apologizing for America... we have enjoyed the greatest standard of living in the world... it's about time we recognized that our forefathers got a hell of a lot more right than wrong. Trying to reason with religious fanatics is like sailing into the wind... you ain't gonna get far.

I personally don't give a tinkers damn what the rest of the world thinks of us... if their citizens want to destroy their societies with Global Warming, stupidity and socialism... more power to them... but that is not what made America great... and we won't go there... we've had enough of these supposed smart people leading us down the path of national destruction. Throw them out!

I could go on... but the hand writing is on the wall... America has finally woken up and soon we'll be rid of these arrogant fascists that call themselves Democrats. And yes... I meant fascist. They want to totally control our lives... they want to tell us what we can say, what we can eat... what we can think and who our doctor will be. These idiots place more value on a stupid manatee that is not even native to North America and murderers... than they do about unborn humans. What insanity!

I want to shift over to what this means to us... and our State and local politicians. We have a "RINO" for a sitting Governor who is running for the Senate... Reject him! Bill Nelson cut a deal on health care for a certain part of our State, protecting seniors... but he excluded other parts of the State, including Duval and Nassau Counties... because we didn't vote for him in the last election... Obviously he doesn't feel he represents the

entire State... just those who voted for him. Reject him when he comes up for re-election.

And for our local pols... I wish every citizen... when he runs into one of these yahoos... would ask them... "What did we get for those hundreds of thousands of Nassau County and Fernandina Beach taxpayers' dollars... that they gave our local "connected" Democrat lobbyist... Where is all that "Hope and Change" money he was supposed to rain down on us"? It was a myth... a mirage. It's time we stopped government largess and wasteful spending on stupid projects. Reduce government, quit expanding it.

In conclusion... Thank you Massachusetts for this wonderful gift and wake up call.

All the best... Roy Stafford
