Well i don't know if this is real or not, but i think this thread deserves a bump at least for confirmation.

Also:

Its a white plastic screen used to project stuff on.

In the video its even clear that the light is coming from the OTHER side of the screen (behind it), as there is no reflection on the metal bars.

The video is taken from the space behind the stage.

The pizzagate links make me think this whole thing is fake. There's plenty of sick fucks on the internet who could have made this video, but I get the feeling that this whole thing is a social media experiment.

The video could easily be real, someone abusing a kid. But even thats hard to prove from what can be seen in the video. There's nothing to see, and the audio of the kid screaming could come from somewhere else, with the voiceover done on top of it.

Here's a simple frequency spectrum comparison. There does not appear to be a clear match. Granted, there's a fuckload of noise in both samples so it's not exactly apples to apples. I'll do another with the crowd/screaming kid filtered out.

For those who don't know, what we're comparing are peaks and troughs in frequency, not overall amplitude.

The perp in the video is yelling, while podesta's voice samples are at regular talking level, and he has a very nasal inflection to his voice which would presumably be less nasal during yelling which comes more from the throat and diaphragm. There is also the fact that New Jersey italian accents all fucking sound the same tbh. I don't see the similarity between podesta and the video to be honest but given the difference between yelling and talking it could still be him. The sound comparison is neither confirmation nor debunking IMO. We need a qualified sound engineer to clean up the noise in both voice samples before any kind of spectral analysis is valid.

It's worse than that, anon. That's steam. It must be scalding hot.

I'm really unsure what to think of this video. It just seems too perfect. If this dropped out of nowhere I'd have taken it as a sign that someone was throwing us a bone but hasn't it been around for a while? Not to say that that disqualifies it from being legit connected to Podesta. But, really?

By the way, if this video is portraying Podesta, then it is proof that the coded messages by Wikileaks is true and the entire Clinton campaign is part of this. This then brings the media into question, and then the television lobby. Everything radiating from the televised Jew should be questioned, especially childrens' programming. Tell me why this scene depicts the characters eating eachother?

Actually, the video WAS posted on YouTube long ago, wasn't it?

Where did all of the other videos on the worldcorp site come from tho? They can't all be from YT as lots of them are of disgusting shit that would be taken down on YT. How are the videos that were on YouTube even linked to all the other ones on the Worldcorp videos section? Also, I just noticed that new vids have been added to the videos section of the worldcorp site as well, one of a dude pissing and drinking it and another of some dude spraying fucking windex all over his dick..... I'd remember if I saw those when I first was linked to it the other day....

Wait tho... did an anon make that worldcorp website since the videos were taken down from YT? Cus thats the impression I was under the other day, but now realizing the site could possibly just be something they stumbled across somehow and posted, maybe? Can anyone clear this up for me plz?

<http://worldcorpo.net/>

Anyways, what I am getting at is, this guy has a point. If these videos are old shit frmo youtube, and just now have been pushed everywhere, added to the fact that they videos are all now linked to a bunch of other sick vidoes on the worldcorp site that would obviously intrigue someone doing pizzagate research, seems like it quite possibly could be a red herring pushed out there from people protecting these pedos so we waste time and energy goign on wild goose chases. What do you guys think? Seems pretty plausible at least.

Two comments. The overall difference in x-axis shape comes down to different frequency response in all stages from the mic to the final webm or other output files. The sawtooth pattern matching is a real effect, and that signature is the same thing your ears measure when you hear that the voices sound like the same man.

I'm suspicious.

That video is fucked up and disturbing but there's nothing connecting it to anything, forensically. If it's even real child torture and not just some r selected amygdala deficient art school faggot project. You can't make out anything of value.

Pattern recognition is our strength but we must be extremely careful about false positives. We need forensic accounting and names of real predators. Not some stupid blurry video that was publicly posted on youtube. What can we even get from this? Is this a lead that could possibly lead to anything? Obviously not.

The fact that this has been spammed everywhere despite being no proof of anything and no valuable intelligence whatsoever makes me think fuckery is afoot.

>Tara Leigh Calico (February 28, 1969 – disappeared September 20, 1988) disappeared near her home in Belen, New Mexico, on September 20, 1988. She is believed to have been kidnapped. Her case

On June 15, 1989, a Polaroid photo of an unidentified young woman and a boy, both gagged and seemingly bound, was found in the parking lot of a convenience store in Port St. Joe, Florida.[3][4] The woman who found that photo said that it was found in a parking space where a white windowless Toyota cargo van had been parking when she arrived at the store. She said that the van was being driven by a man with a mustache believed to be in his 30s; police set up roadblocks to intercept the vehicle, but the man was never caught or identified.[6][8] According to Polaroid officials, the picture had to have been taken after May 1989 because the particular film used in the photograph was not available until then

I looking at those Worldcorp videos it struck me that they were all brief clips.

The point of this was, If a person had seen the entire clip seeing a brief clip of it they would know what they were in there entirety. Let's assume for a minute an investigator from the mid 1980 had these videos in their entirety as part of a criminal investigation. The contents of that investigation wouldn't be general public knowledge.

With this line of thinking the clips now being displayed by Worldstar could be part of a series of "cleared cases or old cases".

A number of thoughts stem from this. Could be complex ARG. Could be ARG with real meaning. I'm tired now, but I wonder if there are connections never discovered and need to be discovered now.

Apparently the site was registered in April of 2016, that is before the Podesta emails were dropped but at the same time worldcorpo is a generic address and if they were running this as a disinfo op they might have just bought the domain. No leads on the owner either since he uses an anonymization proxy company. I dunno, I understand these guys like to hide in plain sight and aren't as smart as they think they are but them being this fucking blatant doesn't make any sense.

How do we link 'world corp' to the DC scum? I don't see it. If they were dumb enough to film something, it would be for their eyes only.  
The older Podesta brother is probably the violent one. He doesn't get enough attention and he has the fucked up shit in his house.

Maybe tangentially related, a while ago [REDACTED] released an episode of Extra where he read out this story of a boy that got kidnapped and raped by alphabet agents and was assumed to be dead. It turns out this kid became a deep state asset or something. If I can webm a thirty minute episode, I'll upload it here or on mixtape. It makes for an interesting listen, if nothing else.

I hate to admit it but you may be right. Why would anyone involved with such sinister shit record themselves doing this type of thing and post it online?

Doesn't really make a lot of sense.

But then again, Andrew Breitbart was talking about this shit back when most of us were Paulfags.

Then again, why was Netanyahu involved with Breitbart to begin with?

Maybe I'm over thinking this shit, but until we have solid evidence that powerful people are doing this shit, this is nothing but conjecture.

You take a small clip of the incriminating data and release it where you know it will be found. Worldcorp has dirt on a pedoring and is blackmailing for money.

If we see any big cash payments from Podesta, DNC, etc. or one of his shell game dummy companies or NGOs in the near future that will confirm the blackmail part. Of course they could just demand cryptocurrency. You could also confirm this by pretending to be podesta, emailing the whois address, and offering money, if it gets a response that will confirm the blackmail theory and it will confirm everything we suspected about podesta.

This is satanic ritual abuse (MKUltra). These kids are being harvested for many purposes, genociding the white race, blackmailing high officials/politicians, psychic experiments, satanic torture and sacrifice... whatever the fuck their owners want really.

Controlled op for what purpose really? What does cointelpro have to gain from having Sam Hyde make comedy vids and work at Adult Swim? If they wanted controlled op media they would tap some guy from the Jew media cartel or use someone else more established. Controlled op media is more similar to PJW, Cemobitch, etc. than Sam Hyde. It might just be that Sam is a degenerate and the tranny allegations were right all along in addition to this freak shit.

there is a lot to read but in reading the comments ARG was mentioned by the posters are to the behavior of the subject in question "Meat"

I know nothing of this character "Meat" or the history which many may, but it involved many similar behaviors with "Worldcorp".

The videos he was producing have since been removed from YouTube so I can't see if there are similarities myself with the Worldcorp material, but another thing to note, multiple web address all tied into ARG play with bizarre material.

There were also map GPS locations, another thing similar to both Worldcorp and Meat's behavior online. I don't know what all of it means, I wanted to add to add additional information here I hadn't seen elsewhere.

in my eagerness to post the connection to Meat and Wordcorp, it's to damn coincidental, videos are of the same style, decimal code is used, ARG, shaky video footage, in reading the last comment Meat posted before going offline he seemed very much into the online bizzaro world he created around the Meat persona and was forced to shut it down, unwillingly. Has he started up again? I'm thinking yes, with Worldcorp..... but another thing hit me. So much of the Meat material was about consuming human captives, just like #SpiritCooking and Podesta.

If I know anything about voice recognition and audio, it doesn't work like that. Plus those tracks don't even match. All they show is that the voice goes into a similar pitch or whatever at certain points. Voice recognition is way more advanced based on comparing how different syllables are pronounced etc. But I've only done one course of signal theory so I might be wrong here.

However the voices do sound similar to me so it's suspicious but it's no hard evidence.

Here is the thing.  
Let's go under the assumption it is a work of artistic fiction.  
If we dig into it and find this out, however it was by Podesta and comet ping pong, despite it being fiction, it being produced by them still raises a lot of red flags urgently.

It is the same thing with the "spirit cooking" even if it is a work of artistic fiction because they are not strictly practicing human sacrifice and cannibalism, it is still very alarming and requires investigation.

I don't think so. I think these people (if real) have lives, and far, far, far to many pieces seem to be falling into place, allegations, processes, connections, the thing that struck me about the ARG related to Worldcorp is this. Consider tracking ARG players from the server side (multiple website in the ARG are connected) as a method of evaluating game players (problem solving) as a recruitment tool as a DOD/CIA operation.

I understand, the soundcloud track offering "child prostitution, dead babies, abortion services" etc. is waaay too fucking blatant, even for people known to hide in plain sight and be stupider than they think. With that said, this being an ARG does not mean the fatherhood.webm is fake, if anything they might be engaging in a well poisoning fallacy where they leak partial pieces of actual evidence into a ARG and then say "look goy, its just some strange art project! Nothing to see here move along those pizzagaters were chasing a red herring this whole time hehe" How the fuck would they even go about faking the fatherhood.webm video? It doesn't make sense and I am almost certain the screaming, torture, etc. is real. I think that there are legit leads here but they are trying to plant it in an ARG to distract and Jew us regardless, an ARG is the perfect kind of generative shilling which would get us all distracted while they clean up evidence and it appeals perfectly to weaponized autists.

This was on TV not 2 days ago, the girl literally told her mother to not look for her if she went missing, and there was NO inclination of a precursor to the kidnapping besides this.

Mother never stopped looking, they found her bones dumped somewhere 3 years later, but who knows? Could have been fake.

The van was at a gas station and a woman found the picture not moments before it left, and it was hardly followed up upon.

The Finders/CIA pedo cases are so rampant in murrica, that this is the EXACT reason why that faggot sodomite John Wayne Gacy went nigh untouched for a time, they legitimately structured the system to avoid possibility of their actions coming to light, even in crude snatch and grab cases.

Not sure if it has been mentioned, but a youtube sleuth linked the Worldcorp website to an already convicted pedophile.

She looked at an archived version of the page, which had an email thats not on the new page, googled it and found an old twitter account. She recognised the images on the account as this person (by chance). Its definitely him.

This website then, with vids of kids screaming, is connected to a real life, proven pedo. In my mind, that immediately ruled out an ARG or "art project". I feel like the art shit is a cover at this point.

So far i see no Podesta connection to the pedo, or to the website. All there is, is the voice which is very similar I must admit.

This is no smoking gun YET. Connect Podesta to the website or the pedo guy ( i wish i could remember his name OR the name of the youtuber). If someone connects them all together, thats case closed for me. It wouldnt hold up in court, but it would be confirmation for us.

In reviewing my information, as I was gathering it Worldcorp is linked with very complex ARG as explained here:

<https://www.youtube.com/watch?v=OteJEpmZZYU>

Look at the complexity here, across various media platforms.

I am looking at it as Worldcorp is not one guy, as a stand alone entity. All evidence points to a very complex criminal enterprise that reaches the highest levels of the US government, George Bush one was linked to MKUltra via a female, in association to cocaine trafficking, sex slavery, The National Center for Missing & Exploited Children is not a governmental agency, why?

Seriously Pizzagate is everythign we suspect and more than likely 100 times worse.

Comparing John Podesta's Voice to Voice Heard in Disturbing Leaked Video

Now, I guess if this was an ARG and someone might want to make it seem real, they could just link it to this guy through the email and twitter accounts.

now that I know its a shower I can see what is going on, the kid can be seen pacing around inside the shower and the man is hitting the shower door with a mop while holding the camera. there is some kind of disco light on the floor. I don't hear running water though so hes just making the kid lose his mind with the lights, confinement, and abusive language.

We can't prove where the video was filmed it's too low quality and contains no meta data. However, I suspect this was NOT in a shower after taking a closer look. Why water proof a lighting system when you can just put her in another enclosure? It doesn't make sense, anon was saying she might be begin frozen/scolded with water but I think they were using another way to inflict pain. Or they weren't causing psychical pain at all. Most torture is psychological in nature and that method is preferred because it doesn't leave marks. This looks like a classic case of sleep deprivation, over stimulated senses (sight/sound), and her handler begin emotionally abusive (give love then deny it).

I think they're a decent case for this having taken place by someone that at least had access to the lighting system used for that stage. It would be easy to move and set-up. However be weary of thinking such systems are unique as they probably just used something off the self.

I'm not saying the voice is his, but trying to discover if the voice is his is the real deal here, not if it happened on Comet.

>>9278070

This is possible too. Shower would provide a nice place to confine her and if the water was cut to it there would be no issues with the lighting. I don't think her handler would risk the child possibly electrocuting herself by turning the tap on.

Judging by my years on imageboards and onion sites there seems to be 2 kinds of pedos mainly: the podesta types who get off on fucking children up in every conceivable way and the fa/tg/uys who are "idealists" that treat children like their 2d waifus.

Yes they like to inflict pain but you have to get into the mind of the man that is doing this to her. I'm not saying it wasn't a shower either, I just suspect that if it is a shower then the water was cut.

My theory is:

>girl was placed in confined space (shower)

>girl was subjected to hours/days of the lighting system and music/loud noises

>only break from the noise was her handler coming to scream at her

>"Turn it off yourself" in the video is referring to the lights which the child is unable to turn off

>the goal is to break her mind over the course of a day or two by keeping her awake, denying confront/food, and making her bend to the handler's will

>handler doesn't want to leave marks because this child might be begin prepped for sex slavery. Even if that's not the case leaving marks draws the eyes of other people

>Child has no marks to tie to the event and will eventually assume it was a "bad dream"

>Child may have been drugged with a substance like LSD to drive her even more mad/speed up this process

Remember, the goal here isn't to inflict pain. The goal is to break the child's mind and make her your slave. These are sick fucks we're dealing with but they do put a lot of thought into this.

It's possibly one of Comet Pizza's private rooms, and the shower doors are part of the stage, so the sick patrons can see a child being tortured while they eat pizza & masturbate, but not be able to see who's doing it, for privacy reasons.

And Podesta would then have probably paid to be the torturer of that innocent kidnap victim.

There might be some noisy floor show going on at the same time, to mingle the screams of the child with some other noises, if they make it to the street or the more public areas of the place...for plausible deniability if anyone reports anything.

What I'm saying is that shower stalls don't necessarily have to be installed on showers, and the only reason they might be being used is to provide the framing for that type of wavy glass.

What I wonder is why the fuck this was filmed though. Some kind of instruction video for fellow freaks? Where the fuck did the video even come from? That website seems to just be a collection of weird shit with 99% horseshit. I don't think these people would use something like that to distribute it when they already have the darknet for every other CP shit. Is that site some kind of leak? Why has it been around forever without any attention then? Why isn't stuff explained? This suggests a troll but it just doesn't seem likely, too much hassle for a troll.

Asking questions is fine you've engaged each other in in-fighting. I could speculate that you two were in on this together attempting to derail people dumping data related to the video but I'm not doing that because I'm trying to work with anon.

Your theory holds water. The video is very low quality even for something recorded on a cell phone. It has obviously been edited slightly and wasn't originally a .webm. As far as I know the .webm IS the only source we have so we should be weary of taking it as fact.

However, consider that

>if this is a child actor she's doing a hell of a performance deserving of an award

>this video might have been floating around on encrypted channels for a long time and we're just getting a copy of a copy of a copy of a re-encode

>The voices match is what anon saying is true

>The lighting system is similar and anyone doing this to lead us down a rabbit hole really did some work to not only find the one used on that stage but also to purchase it (such systems are revised all of the time)

We have enough to go on. Screaming "don't dig it! I'll make us look bad when the ruse is revealed" is just as suspect as what you're accusing the other anon of doing.

I've made a quick attempt at this myself. Here is one with the brightness slightly adjusted and the gamma levels evened out. Should provide a clear picture without washing it out like yours did. Mine also has the audio.

to expand on this, since I'm feeling autistic today - do you know how people post animated jpgs? That's fucking how - they're actually gifs with the extension changed, the board software and browsers don't fucking care what extension an image is, so it stays. However, the board software checks if the file sent is AN ACTUAL IMAGE and if it is, it then allows it to be posted.

Your suggestion to check files through extensions is retarded, you are retarded and you cannot fucking admit that you're fucking ignorant in /tech/ shit, displaying an attitude worthy of a nigger, so, once again, gas yourself

Every time I spend energy helping anon with something related to video this always happens. I haven't done it much over the years but a post like yours seems to come a long every time that I do. Strange that a bored anon that knows a little bit about video seems to bring out so many defeatists.

>oh there's nothing to see

>oh this will make us look bad if it turns out to be an art project

>why even dig and waste time?

I'm bored faggot this is what I do for fun. I'd say it's more useful than all those years I spent in the late 90s/early 2000s encoding anime and watching episodes 10+ times to check for errors so faggots like you could leech them. We're certainly contributing more here than people like you that do nothing but shout about anon wasting his time.

I'm going to go through the rest of the videos from the leak anons to see if anything useful comes up. My work day is almost over and I'll be able to devote more energy to this. I've dumped the raw audio, every frame of the video, and a gamma corrected version of the video in this thread. I don't understand how this has been floating around for so long and no one has done this yet. I guess it was my turn to do some work.

Maybe some faggot on youtube has already revealed all this I don't know. I figured anon would have told me about it by now if they had. Archive everything and spread it around.

Considering how quickly the video appeared and was spread leads me to believe that perhaps an fbianon was involved. Even though it had been on the internet a while, there was no impetus for any of us to go find it. But now I found another sort of whois site.

<http://servicehostnet.com/domain/worldcorpo.net>

It doesn't list the name... but there's an adress and a phone number.

>Registrant State/Province: ON

>Registrant Postal Code: M4K 3K1

>Registrant Country: CA

>kid probably has that for hours every day.

I can't imagine the body handling that level of frequent scalding over many days, kid would get incredibly ill from infection and/or eventually die. So that would mean they'd have medical supplies provided to them like antibiotics and things to treat burns (that's providing they intend to keep the kid alive for a while or at least cover up injuries). Opens a possible query if you can find such deliveries/doctors as they would have to provide "off the books".

Yeah I'm not too familiar with burn injuries but after a while it'd cause your skin to become pretty shit and might even open up a little, then get infected like you said. If we got a few people to search through John podesta's or anyone related to him and their medical purchases we might be able to figure out it's legit or not. Could be using a fake name though, but he did fall for a phishing scam so probably not.

The stick does not seem to be a boom arm, but just a broom. It has no wires, the head is symmetrical and connected to the stick with a fat neck. Not an audio equipment, but a cleaning broom.

The "face" has podesta figures, but is most likely the hand holding the stick. You can see the black stick following the hand, and you can see specular highlight of the stick just over the hand. Face would not have this. You can see the same hand better at 0:25.

Auditory spectrogram: The basic internal representation assumes that the speech sound is separated into a number of frequency bands (distributed evenly across a psychoacoustically based frequency scale like in this case the bark scale) and that the compressed frequency-channel-specific intensity is represented over time. If you compare the dark areas of both pictures they are very similar. The right one is a bit higher in frequency and has more noise.

I honestly think this is just a "smart" marketing campaign by some opportunist trying to cash in on pizzagate. The people behind this and the whole industry know by now that if you make a music video and add some occult shit, there will be a lot of buzz about Illuminati etc. Dropping clues and riddles to the conspiracy sphere is an easy way of generating attention. How many have visited the sound cloud page by know? How many is now familiar with the brand "Worldcorp"? Many, many hits, the name is now known. The people behind this would have to look at this campaign as a great success. At least it's a great case study in online marketing 2017. The music sounds like captain murphy.

>(1)

Well I just got home from work and opened the thread. (1) means shit, everyone makes a (1) post.

>this entire post ignores the fact the videos were created before Pizzagate was even a thing

I have no problem with anyone continuing the research in to this. Satanic pedophile rings has been a thing in conspiracy sphere since at least the eighties. I don't have any doubt that such phenomena exists. I wish you success in researching this and I hope you discover the truth.

>muh morals being proavocado

Yes I am serious. They don't care about your morals, newfag. Playing with concepts like pedophilia is not "beyond" them, you should know that by know. They are all about being provocative, they thinks it's fun and cool, yes le edgy. It's not necessarily about making big money but rather about getting notoriety and respect from a select sphere of people in their industry. They don't give a fuck about right or wrong. Do you care what normies say about you posting "Hitler did nothing wrong :D:D:D"? That's very provocative to normies, but you rightly don't give a shit, invert values and apply the same mentality to a libshit art major.

I do wish you success in researching this and I hope you discover the truth. I just said I "believe", not that it can't be true.

Definitely a mop. With this they can push the water or whatever it is they're using towards the child, or squash it against its skin to burn it with hot water. Doing that and alternating between freezing and boiling water is effective as torture.
