

# The 911 Plot and Comments

## MOSSAD: The Israeli Connection to 9/11

April 8, 2005,  
by Christopher Bollyn,  
American Free Press

U.S. investigators and the controlled media have ignored a preponderance of evidence pointing to Israel's intelligence agency, the Mossad, being involved in the terror attacks of 9/11.

From the very morning aircraft smashed into the World Trade Center (WTC) and the Pentagon, news reports have indicated Israeli intelligence being involved in the events of 9/11 – and the planting of "false flags" to blame Arab terrorists and mold public opinion to support the pre-planned "war on terror."

Shortly after the destruction of the twin towers, radio news reports described five "Middle Eastern men" being arrested in New Jersey after having been seen videotaping and celebrating the explosive "collapses" of the WTC.

These men, from a phony moving company in Weehawken, N.J., turned out to be agents of Israeli military intelligence, Mossad. Furthermore, their "moving van" tested positive for explosives.

Dominic Suter, the Israeli owner of Urban Moving Systems, the phony "moving company," fled in haste, or was allowed to escape, to Israel before FBI agents could interrogate him. The Israeli agents were later returned to Israel on minor visa violations.

The Assistant Attorney General in charge of criminal investigations at the time was Michael Chertoff, the current head of the Dept. of Homeland Security. Chertoff, the son of the first hostess of Israel's national air carrier, El Al, is thought to be an Israeli national.

One of the Israeli agents later told Israeli radio that they had been sent to "document the event" – the event which took the lives of some 3,000 Americans.

Despite the fact that the Israelis arrested in New Jersey evidently had prior knowledge or were involved in the planning of 9/11, the U.S. mainstream media has never even broached the question of Israeli complicity in the attacks.

## ISRAELIS FOREWARNED

On September 12, 2001, the Internet edition of The Jerusalem Post reported, "The Israeli foreign ministry has collected the names of 4,000 Israelis believed to have been in the areas of the World Trade Center and the Pentagon at the time of the attack."

Yet only one Israeli was killed at the WTC and two were reportedly killed on the "hijacked" aircraft.

Although a total of three Israeli lives were reportedly lost on 9/11, speechwriters for President George W. Bush grossly inflated the number of Israeli dead to 130 in the president's address to a joint session of Congress on September 20, 2001.

The fact that only one Israeli died at the WTC, while 4,000 Israelis were thought to have been at the scene of the attacks on 9/11 naturally led to a widespread rumor, blamed on Arabic sources, that Israelis had been forewarned to stay away that day.

"Whether this story was the origin of the rumor," Bret Stephens, the Post's editor-in-chief wrote in 2003, "I cannot say. What I can say is that there was no mistake in our reporting."

## ODIGO INSTANT MESSAGES

Evidence that Israelis had been forewarned several hours before the attacks surfaced at an Israeli instant messaging service, known as Odigo. This story, clear evidence of Israeli prior knowledge, was reported only briefly in the U.S. media – and quickly forgotten.

At least two Israel-based employees of Odigo received warnings of an imminent attack in New York City more than two hours before the first plane hit the WTC. Odigo had its U.S. headquarters two blocks from the WTC. The Odigo employees, however, did not pass the warning on to the authorities in New York City, a move that could have saved thousands of lives.

Odigo has a feature called People Finder that allows users to seek out and contact others based on certain demographics, such as Israeli nationality.

Two weeks after 9/11, Alex Diamandis, Odigo's vice president, reportedly said, "It was possible that the attack warning was broadcast to other Odigo members, but the company has not received reports of other recipients of the message."

The Internet address of the sender was given to the FBI, and two months later it was reported that the FBI was still investigating the matter. There have been no media reports since.

Odigo, like many Israeli software companies, is based and has its Research and Development (R&D) center in Herzliya, Israel, the small town north of Tel Aviv, which happens to be where Mossad's headquarters are located.

Shortly after 9/11, Odigo was taken over by Comverse Technology, another Israeli company. Within a year, five executives from Comverse were reported to have profited by more than \$267 million from "insider trading."

Through Israeli "venture capital" (VC) investment funds, Mossad spawns and sponsors scores of software companies currently doing business in the United States. These Israel-based companies are sponsored by Mossad funding sources such as Cedar Fund, Stage One Ventures, Veritas Venture Partners, and others.

As one might expect, the portfolios of these Mossad-linked funding companies contain only Israeli-based companies, such as Odigo.

Reading through the strikingly similar websites of these Israeli "VC" funds and their portfolio companies, one can't help but notice that the key "team" players share a common profile and are often former members of "Israel's Intelligence Corps" and veterans of the R&D Department of the Israel Air Force or another branch of the military. Most are graduates of Israel's "Technion" school in Haifa, Mossad's Interdisciplinary Center (IDC) in Herzliya, or a military program for software development.

The IDC, a private, non-profit university, is closely tied to the Mossad. The IDC has a "research institute" headed by Shabtai Shavit, former head of the Mossad from 1989 to 1996, called the International Policy Institute for Counter-Terrorism.

The IDC also has a "Marc Rich Center for the Study of Commodities, Trading and Financial Markets" and a "Lauder School of Government, Diplomacy and Strategy." The cosmetics magnate Ronald S. Lauder, who is a supporter of Israel's Prime Minister Ariel Sharon and his far-right Likud Party, founded the Lauder school.

Lauder, president of the Jewish National Fund and former chairman of New York Governor George Pataki's Commission on Privatization, is the key individual who pushed the privatization of the WTC and former Stewart AFB, where the flight paths of the two planes that hit the twin towers oddly converged. Ronald Lauder played a significant, albeit unreported, role in the preparation for 9/11.

Pataki's wife, Libby, has been on Lauder's payroll since at least 2002 and reportedly earned \$100,000 as a consultant in 2004. According to The Village Voice, between 1994 and 1998, Gov. Pataki earned some \$70,000 for speaking to groups affiliated with Lauder.

#### THE PTECH CUTOOUT

Ptech, a mysterious software company has been tied with the events of 9/11. The Quincy, Massachusetts-based company was supposedly connected to "the Muslim Brotherhood" and Arab financiers of terrorism.

The firm's suspected links with terrorism resulted in a consensual examination by the FBI in December 2002, which was immediately leaked to the media. The media reports of the FBI "raid" on Ptech soon led to the demise of the company.

Ptech "produced software that derived from PROMIS, had an artificial intelligence core, and was installed on virtually every computer system of the U.S. government and its military agencies on September 11, 2001," according to Michael Ruppert's From the Wilderness (FTW) website.

"This included the White House, Treasury Dept. (Secret Service), Air Force, FAA, CIA, FBI, both houses of Congress, Navy, Dept. of Energy, IRS, Booz Allen Hamilton, IBM, Enron and more," FTW reported.

"Whoever plotted 9/11 definitely viewed the FAA as the enemy that morning. Overriding FAA systems would be the most effective way to ensure the attacks were successful," FTW reported. "To do this, the FAA needed an evolution of PROMIS software installed on their systems and Ptech was just that; the White House and Secret Service had the same software on their systems – likely a superior modified version capable of 'surveillance and intervention' systems."

But did the U.S. government unwittingly load software capable of "surveillance and intervention" operations and produced by a company linked to terrorism onto its most sensitive computer networks, or was Ptech simply a Mossad "cutout" company?

Oussama Ziade, a Lebanese Muslim immigrant who came to the U.S. in 1985, founded Ptech in 1994. But the company's original manager of marketing and information systems was Michael S. Goff, whose PR firm, Goff Communications, currently represents Guardium, a Mossad-linked software company.

And Goff comes from a well-to-do line of Jewish Masons who have belonged to Worcester's Commonwealth Lodge 600 of B'nai Brith for decades. So, why would a recently graduated Juris Doctor in Law leave a promising law career to join forces with a Lebanese Muslim's upstart company sponsored with dodgy funders in Saudi Arabia?

"As information systems manager [for Ptech], Michael handled design, deployment and management of its Windows and Macintosh, data, and voice networks," Goff's website says. "Michael also performed employee training and handled all procurement for software, systems and peripherals."

AFP asked Goff, who left the Worcester law firm of Seder & Chandler in 1994, how he wound up working at Ptech. "Through a temp agency," Goff said. Asked for the name of the agency, Goff said he could not remember.

Could it be Mossad Temps, or maybe Sayan Placement Agency?

Goff, the original marketing manager for Ptech software, said he did not know who had written the code that Ptech sold to many government agencies. Is this believable?

Goff leaves a legal practice in his home town to take a job, through a temp agency, with a Lebanese Muslim immigrant who is selling software, and he doesn't know who even

wrote the code?

AFP contacted the government agencies that reportedly have Ptech software on their computers, and IBM, to ask if they could identify who had written the source code of the Ptech software.

By press time, only Lt. Commander Ron Steiner of the U.S. Navy's Naval Network Warfare Command had responded. Steiner said he had checked with an analyst and been told that none of the Ptech software has been approved for the Navy's enterprise networks.

Comment: Mr. Bollyn, author of this article, was the first to put forward the thesis that the WTC buildings were destroyed by a "plasmoid cloud," developed by an unnamed "East German scientist" purportedly working with the KGB, (which had been out of business for ten years.) Now, apparently, it is the Jews who were to blame. Perhaps next month it will be the Campfire Girls or the Hidden Hand.

To: TBR News  
Subject: Short-selling of Stock on 9-11  
Date: April 15, 2005

There was a lot of talk about short selling just before 9/11 in the weeks following the tragedy. A lot of it was claimed to be due to the "collective conscience" and not underhanded dealings. Hum, I would like to believe that but with the government saying this, I need to question something.

At any rate, this was the reason given by the Bush Administration to start a futures market on the US itself. The thinking was that if some collective consciousness was at work, a future negative event for the US would be quickly reflected in a drop in a futures market based upon the US.

I was pretty sure that the identification of the trend was real. The question is, were all of these people involved or was the right kind of leak timed to help Al-Qaeda make money on investments.

There was also the report that many Jews did not show up for work at the WTC that day. From what I can recall, I have heard all or most of this reported by real news agencies in the weeks following 9/11. The mystery is, what was going on? Divine Intervention?

Larry Ober

***Response:***

Dear Mr. Ober:

I have had many requests for more information, specifically any sources, for this subject. I am including some of these in the attachment.

I have a friend at NASDAC who informs me that this is a forbidden topic and although there was a FBI and NYSE investigation at the time, now, all is silence. I, myself, saw references to this in the media and at the time but now, there are no references anywhere.

Perhaps what I have enclosed will be of some help to you.

As I understand it from contemporary news sources, including a German one that I did not use, there were three centers of activity: the Toronto, Frankfurt and New York Stock exchanges, and that all of the speculators were Israelis.

There is no doubt at all that Israel was aware of the pending attack, through the activities of their highly effective MOSSAD, but also note that the U.S. government was *fully informed* by the Israeli government on *three separate occasions* prior to the attack. Our very

own CIA, on the other hand, was so deeply engrossed in trying to figure out who sunk the battleship 'Maine' to bother about such matters. The Jews tend to get the blame for many things but in this case, they did what they should have.

I see the real problem here very simply: **Given the large number of acknowledged warnings sent to, and received by, the United States Government long before this attack, what did the President know about this and when did he know it? It is difficult, if not impossible, to prove a negative but there is still the question to be asked.**

If I can answer any more questions, please advise me. I was not the first person to put this out because at the time, I received a number of emails from different areas, most of them not the usual conspiratorial people, and they were not using a common source (which can help spread unfounded rumors as we know.)

Your email on this subject is one of a number expressing interest. When this was posted, we did not have a large viewing public but now we reach 30,000-50,000 a day and I perhaps ought to repost the entire file (some of which has never been published) and see what is forthcoming.

Walter Storch

### ***Enclosure***

### **Timeline for 911 Events**

**August 8-23, 2001:** Two high ranking Israeli Mossad agents come to Washington to warn the FBI and CIA that up to 200 terrorists have slipped into the US and are planning an imminent major assault in the US. Indications point to a highly visible target. [Sources: *Telegraph*, 9/16/01, *Los Angeles Times*, 9/16/01, *Fox News*, 5/17/02] The Mossad gives the CIA a list of terrorists. A major Israeli spy ring was hard on the heels of at least four members of the 9/11 hijackers, including lead hijacker Mohammed Atta. [Source: *BBC*, 10/2/01]

**August 24, 2001,** the head of the Israeli *Mossad* reported the imminence of an Arab attack against American targets and a similar report was made by the same agency on **September 7, 2001.**

**September 6-7, 2001** -- 4,744 put options (a speculation that the stock will go down) are purchased on United Air Lines stock as opposed to only 396 call options (speculation that the stock will go up). This is a dramatic and abnormal increase in sales of put options. Many of the UAL puts are purchased through *Deutschebank*/AB Brown, a firm managed until 1998 by the current Executive Director of the CIA, A.B. "Buzzy" Krongard. [Source: *The New York Times*; *The Wall Street Journal*.]

**September 10, 2001** -- 4,516 put options are purchased on American Airlines as compared to 748 call options. [Source: above]

**September 6-11, 2001** -- No other airlines show any similar trading patterns to those experienced by UAL and American. The put option purchases on both airlines were 600% above normal. This at a time when *Reuters* (September 10) issues a business report stating, "Airline stocks may be poised to take off."

**September 6-10, 2001** -- Highly abnormal levels of put options are purchased in Merrill Lynch, Morgan Stanley, AXA Re(insurance) which owns 25% of American Airlines, and Munich Re. All of these companies are directly impacted by the September 11 attacks.

It has been documented that the CIA, the Israeli Mossad and many other intelligence agencies monitor stock trading in real time using highly advanced programs reported to be descended from Promis software. This is to alert national intelligence services of just such kinds of attacks. Promis was reported, as recently as June, 2001 to be in Osama bin Laden's possession and, as a result of recent stories by FOX, both the FBI and the Justice Department have confirmed its use for U.S. intelligence gathering through at least this summer. This would

confirm that CIA had additional advance warning of imminent attacks. [Sources: *The Washington Times*, June 15, 2001; *Fox News*, October 16, 2001]

## **SEC SECRET PROBE OF STOCK DEALINGS BEFORE 9/11**

Between August 26 and September 11, 2001, a group of speculators, identified by the American Securities and Exchange Commission as Israeli citizens, sold "short" a list of 38 stocks that could reasonably be expected to fall in value as a result of the pending attacks. These speculators operated out of the Toronto, Canada and Frankfurt, Germany, stock exchanges and their profits were specifically stated to be "in the millions of dollars."

Short selling of stocks involves the opportunity to gain large profits by passing shares to a friendly third party, then buying them back when the price falls. Historically, if this precedes a traumatic event, it is an indication of foreknowledge. It is widely known that the CIA uses the *Promis* software to routinely monitor stock trades as a possible warning sign of a terrorist attack or suspicious economic behavior. A week after the Sept. 11 attacks, the *London Times* reported that the CIA had asked regulators for the Financial Services Authority in London to investigate the suspicious sales of millions of shares of stock just prior to the terrorist acts. It was hoped the business paper trail might lead to the terrorists.

Investigators from numerous government agencies are part of a clandestine but official effort to resolve the market manipulations. There has been a great deal of talk about insider trading of American stocks by certain Israeli groups both in Canada and Germany between August 26 and the Sept. 11 attacks on the World Trade Center and the Pentagon.

Lynne Howard, a spokeswoman for the Chicago Board Options Exchange (CBOE), stated that information about who made the trades was available immediately. "We would have been aware of any unusual activity right away. It would have been triggered by any unusual volume. There is an automated system called 'blue sheeting,' or the CBOE Market Surveillance System, that everyone in the business knows about. It provides information on the trades - the name and even the Social Security number on an account - and these surveillance systems are set up specifically to look into insider trading. The system would look at the volume, and then a real person would take over and review it, going back in time and looking at other unusual activity."

Howard continued, "The system is so smart that even if there is a news event that triggers a market event it can go back in time, and even the parameters can be changed depending on what is being looked at. It's a very clever system and it is instantaneous. Even with the system, though, we have very experienced and savvy staff in our market-regulations area who are always looking for things that might be unusual. They're trained to put the pieces of the puzzle together. Even if it's offshore, it might take a little longer, but all offshore accounts have to go through U.S. member firms - members of the CBOE - and it is easily and quickly identifiable who made the trades. The member firm who made the trades has to have identifiable information about the client under the 'Know Your Customer' regulations (and we share all information with the Securities and Exchange Commission.)"

Given all of this, at a minimum the CBOE and government regulators who are conducting the secret investigations have known for some time who made the options puts on a total of 38 stocks that might reasonably be anticipated to have a sharp drop in value because of an attack similar to the 9/11 episode. The silence from the investigating camps could mean several things: Either terrorists are responsible for the puts on the listed stocks or others besides terrorists had foreknowledge of the attack and used this knowledge to reap a nice financial harvest from the tragedy.

Adam Hamilton of Zeal LLC, a North Dakota-based private consulting company that publishes research on markets worldwide, stated that "I heard that \$22 million in profits was made on these put options..."

Federal investigators are continuing to be so closed-mouthed about these stock trades, and it is clear that a much wider net has been cast, apparently looking for bigger international fish involved in dubious financial activity relating to the 9/11 attacks on the world stock markets.

Just a month after the attacks the SEC sent out a list of stocks to various securities firms around the world looking for information. The list includes stocks of *American, United, Continental, Northwest, Southwest and US Airways* airlines, as well as *Martin, Boeing, Lockheed Martin Corp., AIG, American Express Corp, American International Group, AMR Corporation, Axa SA, Bank of America Corp, Bank of New York Corp, Bank One Corp, Cigna Group, CNA Financial, Carnival Corp, Chubb Group, John Hancock Financial Services, Hercules Inc, L-3 Communications Holdings, Inc., LTV Corporation, Marsh & McLennan Cos. Inc., MetLife, Progressive Corp., General Motors, Raytheon, W.R. Grace, Royal Caribbean Cruises, Ltd., Lone Star Technologies, American Express, the Citigroup Inc., Royal & Sun Alliance, Lehman Brothers Holdings, Inc., Vornado Reality Trust, Morgan Stanley, Dean Witter & Co., XL Capital Ltd., and Bear Stearns.*

The *Times* said market regulators in Germany, Japan and the US all had received information concerning the short selling of insurance, airlines and arms companies stock, all of which fell sharply in the wake of the attacks.

City of London broker and analyst Richard Crossley noted that someone sold shares in unusually large quantities beginning three weeks before the assault on the WTC and Pentagon.

He said he took this as evidence that someone had insider foreknowledge of the attacks.

"What is more awful than he should aim a stiletto blow at the heart of Western financial markets?" he added. "But to profit from it? Words fail me."

The US Government also admitted it was investigating short selling, which evinced a compellingly strong foreknowledge of the coming Arab attack.

There was unusually heavy trading in airline and insurance stocks several days before Sept. 11, which essentially bet on a drop in the worth of the stocks.

It was reported by the Interdisciplinary Center, a counter-terrorism think tank involving former Israeli intelligence officers, that insiders made nearly \$16 million profit by short selling shares in *American* and *United Airlines*, the two airlines that suffered hijacking, and the investment firm of *Morgan Stanley*, which occupied 22 floors of the WTC.

Apparently none of the suspicious transactions could be traced to bin Laden because this news item quietly dropped from sight, leaving many people wondering if it tracked back to American firms or intelligence agencies.

Most of these transactions were handled primarily by *Deutsche Bank-A.B.Brown*, a firm which until 1998 was chaired by A. B. "Buzzy" Krongard, who later became executive director of the CIA.

More serious was an article in the Sept. 28, 2001 edition of the *Washington Post* stating that officials with the instant messaging firm of *Odigo* in New York confirmed that two employees in Israel received text messages warning of an attack on the WTC *two hours* before the planes crashed into the buildings!

The firm's vice president of sales and marketing, Alex Diamandis said it was possible that the warning was sent to other *Odigo* members, but they had not received any reports of such.

The day after, the *Jerusalem Post* claimed two Israelis died on the hijacked airplanes and that 4,000 were missing at the WTC.

A week later, a Beirut television station reported that 4,000 Israeli employees of the WTC were absent the day of the attack.

This information spread across the Internet but was quickly branded a hoax.

On Sept. 19, the *Washington Post* reported about 113 Israelis were missing at the WTC and the next day, President Bush noted more than 130 Israelis were victims.

Finally, on Sept. 22, the *New York Times* stated "There were, in fact, only **three** Israelis who had been confirmed as dead: two on the planes and another who had been visiting the towers on business and who was identified and buried."

Investigators from numerous government agencies are part of a clandestine but official effort to resolve the market manipulations. There has been a great deal of talk about the insider trading of American stocks by certain Israeli groups both in Canada and Germany between August 26 and the Sept. 11 attacks on the World Trade Center and the Pentagon.

Government investigators have maintained a diplomatic silence about a Department of Justice (DOJ) probe of possible profiteering by interested parties with advance knowledge of the attack.

On Sept. 6, 2001, the Thursday before the tragedy, **2,075** put options were made on United Airlines and on Sept. 10, the day before the attacks, **2,282** put options were recorded for American Airlines. Given the prices at the time, this could have yielded speculators **between \$2 million and \$4 million in profit.**

The matter still is under investigation and none of the government investigating bodies -including the FBI, the Securities and Exchange Commission (SEC) and DOJ -are speaking to reporters about insider trading. Even so, suspicion of insider trading to profit from the Sept. 11 attacks is not limited to U.S. regulators. Investigations were initiated in a number of places including Japan, Germany, the United Kingdom, France, Luxembourg, Hong Kong, Switzerland and Spain. As in the United States, all are treating these inquiries as if they were state secrets.
