PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: ~~SVI-TNS~~ 0080

SESSION NUMBER: 001

DATE OF SESSION: 1 Feb 89

DATE OF REPORT: 3 Feb 89

START: 1415

END: 1325

METHODOLOGY: CRV

VIEWER IDENTIFIER: 095

1. (S/NF/SK) MISSION: Identify and describe training site no. 80, using Stage VI techniques.
2. (S/NF/SK) VIEWER TASKING: Encrypted coordinates 651911/370231.
3. (S/NF/SK) COMMENTS: Viewer successfully accessed site, described complex dimensional concepts of the structure, and recorded them in proper relationship to one another. Because of unusual nature and construction of the structure (a one-pier suspension bridge with rotating restaurant on top), viewer did not successfully identify precise nature of site.
4. (S/NF/SK) EVALUATION: 3

HANDLE VIA SKEET CHANNELS ONLY

SECRET/NOFORN

CLASSIFIED BY: DIA (DT)
DECLASSIFY: OADR

CRV

Site is a tall and broad structure of modern, urban design. Predominant colors are white, silver, browns. One portion of the structure is patterned with closely spaced rectangles. The structure has many right angles but there is also some angles that are less than right angles. The structure has a flat roof with a raised rim. The land immediately around the structure is flat but slopes down in all directions after that. In one direction is water. In that same direction is a series of rectangular structures in a row. There is city nearby. On one side the structure extends upward vertically, on the other side the structure slopes up at an angle then crosses horizontally and then curves upward. Between these two sides of the building is an airy area. Below the bottom horizontal line of the building is water and also a tubular shaped compartment. The very top of the building is in two pieces: a cap and an under portion. There is motion associated with the cap.

The cap is metallic and has a functional use though the architect went out of his way to make it somewhat ornate. Lots of the structural components terminate here. There are rails and supports in the cap. Associated with the cap is the idea of timed motion. The cap has an inside which is a large open room. People are there for specific blocks of time. They are watching and chattering. The room is smokey. The people either time the motion or keep time by the motion.

Memorial to bravery, the Bridge of the Slovak National Uprising (above) at Bratislava honors partisans who fought the Nazis—and offers diners in a tower-crowning restaurant a view of the land they fought over.

~~Windows of the new Hilton hotel in Budapest yield a crazy-quilt image of rebuilt Fishermen's Bastion, named for the guild charged with the original rampart's defense.~~
