ADL Ble
bombing attack
on Statue of
Liberty.

Site involves a large, grey, solid, massive structure, off by itself in a desert-type setting; (surrounds terrain is wide open, dry, sparsely vegetated, light colored, & slightly rolling, with a suggestion of dry, rocky mountains or hills in the distance). Impression of a vehicle going through this terrain (raising a dust cloud); vehicle contains at least 2 persons - at least one of which is male. Persons seem to be non-U.S. Destination of vehicle is the large structure. AOL of Middle-East is suggested.

Some event is involved - sudden, but expected by at least some people involved. AOL of explosion or bomb detonation.

Impression of large round, metallic object - heavy construction, & involves wear & rotating parts. Metallic object is intended to accomplish some specific purpose involving - AOL - defence. ~~There~~ There is a sense of rotating & loading, (AOL Bk - "like the bolt of a rifle or artillery piece").

The idea of a very intense, ~~glaring~~ glowing light or reflection is present, indicating concentrated, intense heat.

There is a large, round/dome-shaped interior area w/ reinforced ^{girder} suggesting a hangar or more an AOL of the inside of an observatory. "Huge" voluminous space. Echoes, & the sense it's intended to house something which is on occasion exposed to the outside. A definite foreign feel involved - not even Western European - more "like" eastern USSR, China, Mongolia,

Countoured surface (Aer. like something intended to fly.)

Sense of organization, preparation, meticulous detail, technical expertise, ^{perhaps} inimical purpose involved.

Relatively small number of people involved, but connection with ^{broader} ~~wider~~ circle of people exist.

Site involves a large, grey, solid, massive structure, off by itself in an isolated setting. Further impression of a vehicle going through wide open, dry, sparsely vegetated, light colored, and slightly rolling terrain, with a suggestion of dry, rocky mountains or hills in the distance. Vehicle is raising a dust cloud and contains at least 2 persons--at least one of which is male. Persons seem to be non-U.S. Destination or purpose of the vehicle seems to be large structure (concept involved that vehicle never actually arrives at structure itself). AOL of Middle-East. Some event is involved--sudden, but expected by at least some people involved. AOL of explosion or bomb detonation.

Impression of large, round, metallic object--of heavy-duty construction--perhaps involving moveable or rotating parts. Metal object is intended for some specific purpose (AOL involving defense). There is a sense of rotating and locking (AOL "like the bolt of a rifle or an artillery piece").

The idea of a very intense, glowing light or reflection is present, indicating concentrated, intense heat.

There is a large, round/dome-shaped interior area w/reinforced girders over head, suggesting a hanger or even an AOL of the inside of an observatory. "Huge" voluminous space; echos; and the sense it's intended to house something which is on occasion exposed to the outside. A definite foreign feel involved--not even West European--more "like" eastern USSR, China, Mongolia, Central Asia, usw.

Impression of something white with wide-spread, contoured surfaces (AOL like something intended to fly.) Sense of organization, preparation, meticulous detail, technical expertise, and perhaps inimical prupose involved. Relatively small number of people involved, but connection with broader circle of people exists.

At this point, AOL D of airborne terrorist attack on Statue of Liberty intruded, and wouldn't go away, so ended session.
