Essential Networking Solution

The LaCie d2 Network 2 offers professional, reliable, central storage for instantly storing, sharing, and backing up from any PC or Mac® on your network, and best of all, it's fully compatible with Windows®, Mac, and Linux operating systems. Manage your home or small office network easily with this full-featured file server, recommended for networks with up to 200 users. The d2 Network 2 is perfectly suited for quiet environments or for professional IT server rooms thanks to its 19" rackmount capability.**

Simple, User-Friendly Administration

With the d2 Network 2's new widget-based dynamic web interface, administration is easy, convenient and secure. Thanks to DHCP and Apipa support, network configuration is fast and automatic. The product integrates easily with existing Windows domains using Active Directory and it allows user, groups, share and quota management. Access to administration pages and shares is easy using LaCie Network Assistant and, on top of that, it can provide its administrator notifications via email of events like backup, disk failure, high temperature, etc.
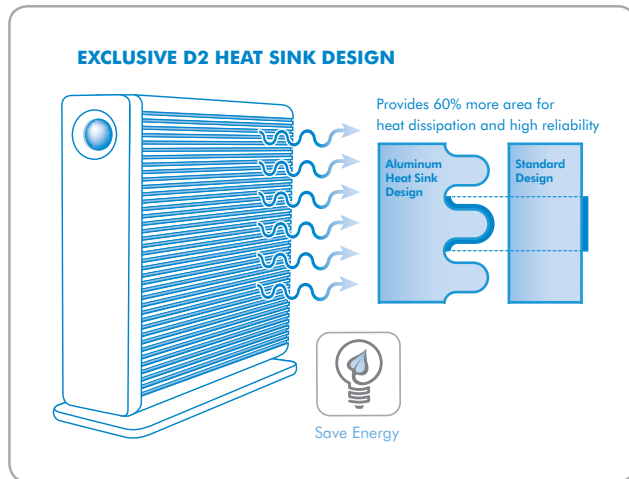

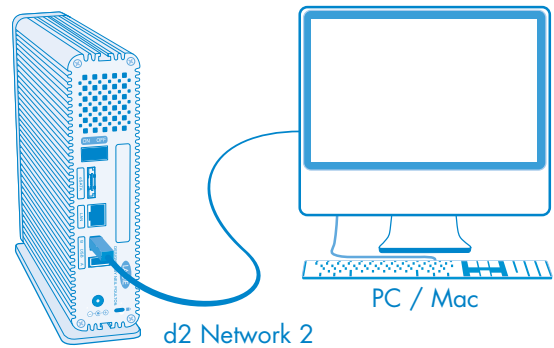

A Complete Backup Solution

Get extra security and increase data portability by backing up your LaCie d2 Network 2—on your own schedule— to an external hard drive through its USB and eSATA ports using the built-in copy system. The LaCie d2 Network 2 also comes with Genie® Backup Manager Pro™ for Windows and Intego® Backup Manager Pro™ for Mac to install on each PC/Mac for client backups to the NAS. This software lets you reliably and efficiently back up your documents, emails, settings, or other digital assets; it supports compressed, encrypted, or image backups and initiates a computer recovery program in case of general crash. Also, the LaCie d2 Network 2 is compatible with Mac OS X v10.5 Leopard, including Time Machine®, making it an ideal partner for your Mac.

BACKUP
Genie® for Windows®   Intego® for Mac®
MANAGER PRO

- Fast access to your NAS—performance up to 68 MB/s*
- Complete backup solution for data integrity
- Advanced power management options
- Dynamic DNS remote access

USB Direct Connection

You can connect your d2 Network 2 directly to your computer through a USB cable to access a dedicated USBShare folder of up to 500GB like a normal external hard drive. This unique feature allows you to gain extra flexibility and mobility for customized usage. So you'll be able to format this USBShare in your preferred file system using your computer.

EXCLUSIVE D2 HEAT SINK DESIGN

Provides 60% more area for heat dissipation and high reliability

Aluminum Heat Sink Design
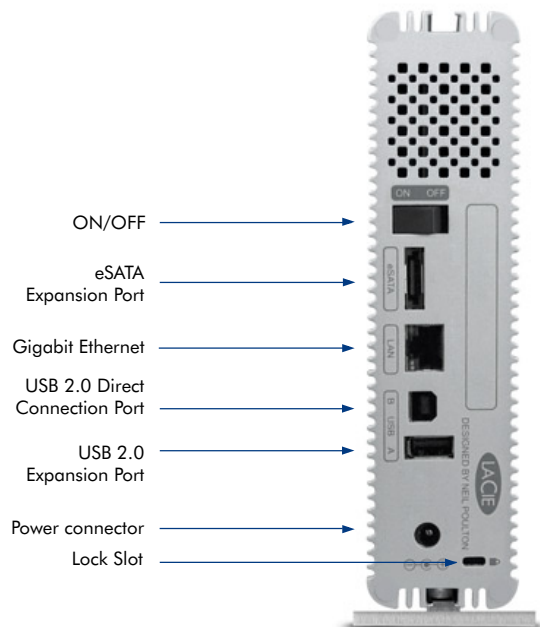

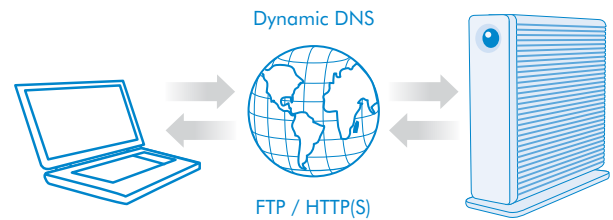

Standard Design

Save Energy

Eco Management

The LaCie d2 Network 2 helps you to reduce power consumption by switching to idle mode (where the disk spins off) after a determined inactivity time. Also, you can schedule a deep sleep on/off mode according your needs. Thanks to the Wake-on-LAN feature, the d2 Network 2 can be switched back to operating mode from the client side. In addition, it also integrates UPS support*** through its USB port to ensure proper shutdown in case of power failure. On top of that, its exclusive aluminum fanless heat sink design makes it your ecological partner—it's recyclable and ROHS-compliant.

Remote Access

With Automatic Port Forward, you can take advantage of UPnP-IGD/NAT-PMP compatible routers and easily access your d2 Network 2 remotely. With the Dynamic IP integration you can create your own Internet address for your NAS. Thanks to its advanced file browser based in Ajaxplorer you can also easily see, download and use your documents stored in your LaCie d2 Network 2.
