

HDHU.14 Firmware Update

January 31st, 2022

1. Download the HDHU.14 Firmware Update and Save to Computer.

After downloading, make sure the compressed files are unzipped and are copied onto a blank USB Flash Drive (64GB Max) on the Root Directory File of USB Flash Drive

2. Insert USB stick and select the “Settings Icon” from the Home Screen

3. Select “System Settings” Tab at top, then next screen select “About” button

4. Select “Update” and on next screen select “Update” Again

5. ((Wait for both Updates to complete)) Headunit will restart itself once both updates are complete. New Firmware Info:

MCU – HDHU-14-220126

SOC – HDHU.14-220124-12:00

Firmware Improvements:

- Adds 10-Second Amplifier Turn-on Option
- Defaults Key-Beep Alert to “Off”
- Balances the Source Levels (USB, BT)
- Increases Overall Level Before Clipping
- Reduces Intermittent Data Feedback
